

Broadband Public Safety in 700 MHz

French Ministry of Interior
gilles.delaplace@gendarmerie.interieur.gouv.fr

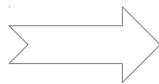

Part I, Broadband Public Safety in France

Part II, Eco-system

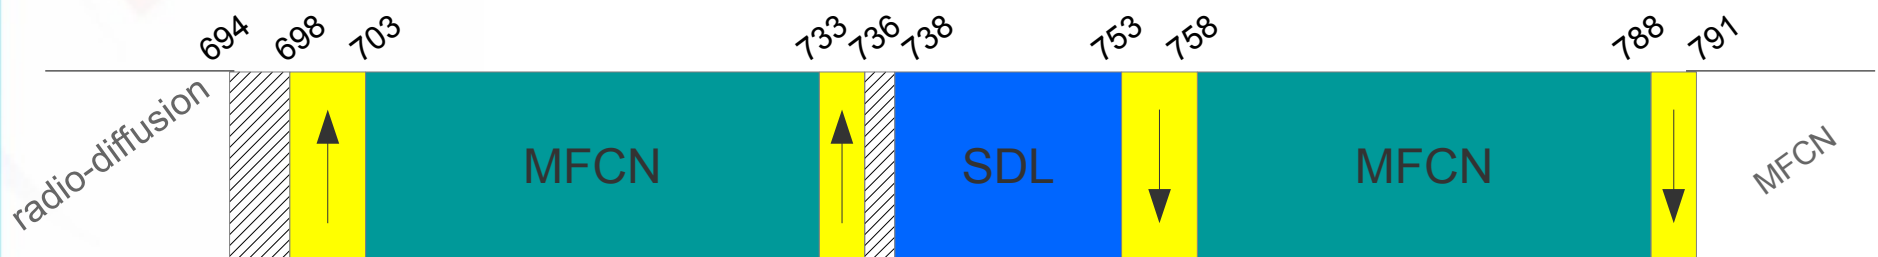

Public Safety in France

- **Mol Legacy network (Tetrapol technology)**
 - Is becoming obsolete & congested in the mid-term
 - Does not provide high data rate requested by new services & applications
 - Willing to move to broadband solution
 - Priority for deployable stations in a first phase
- **700 Mhz Frequency band released by radio-diffusion organism from 2016 to 2019**

ANFR
french regulator

2x3 + 2x5 MHz frequency bands awarded to Mol for Public Safety usage

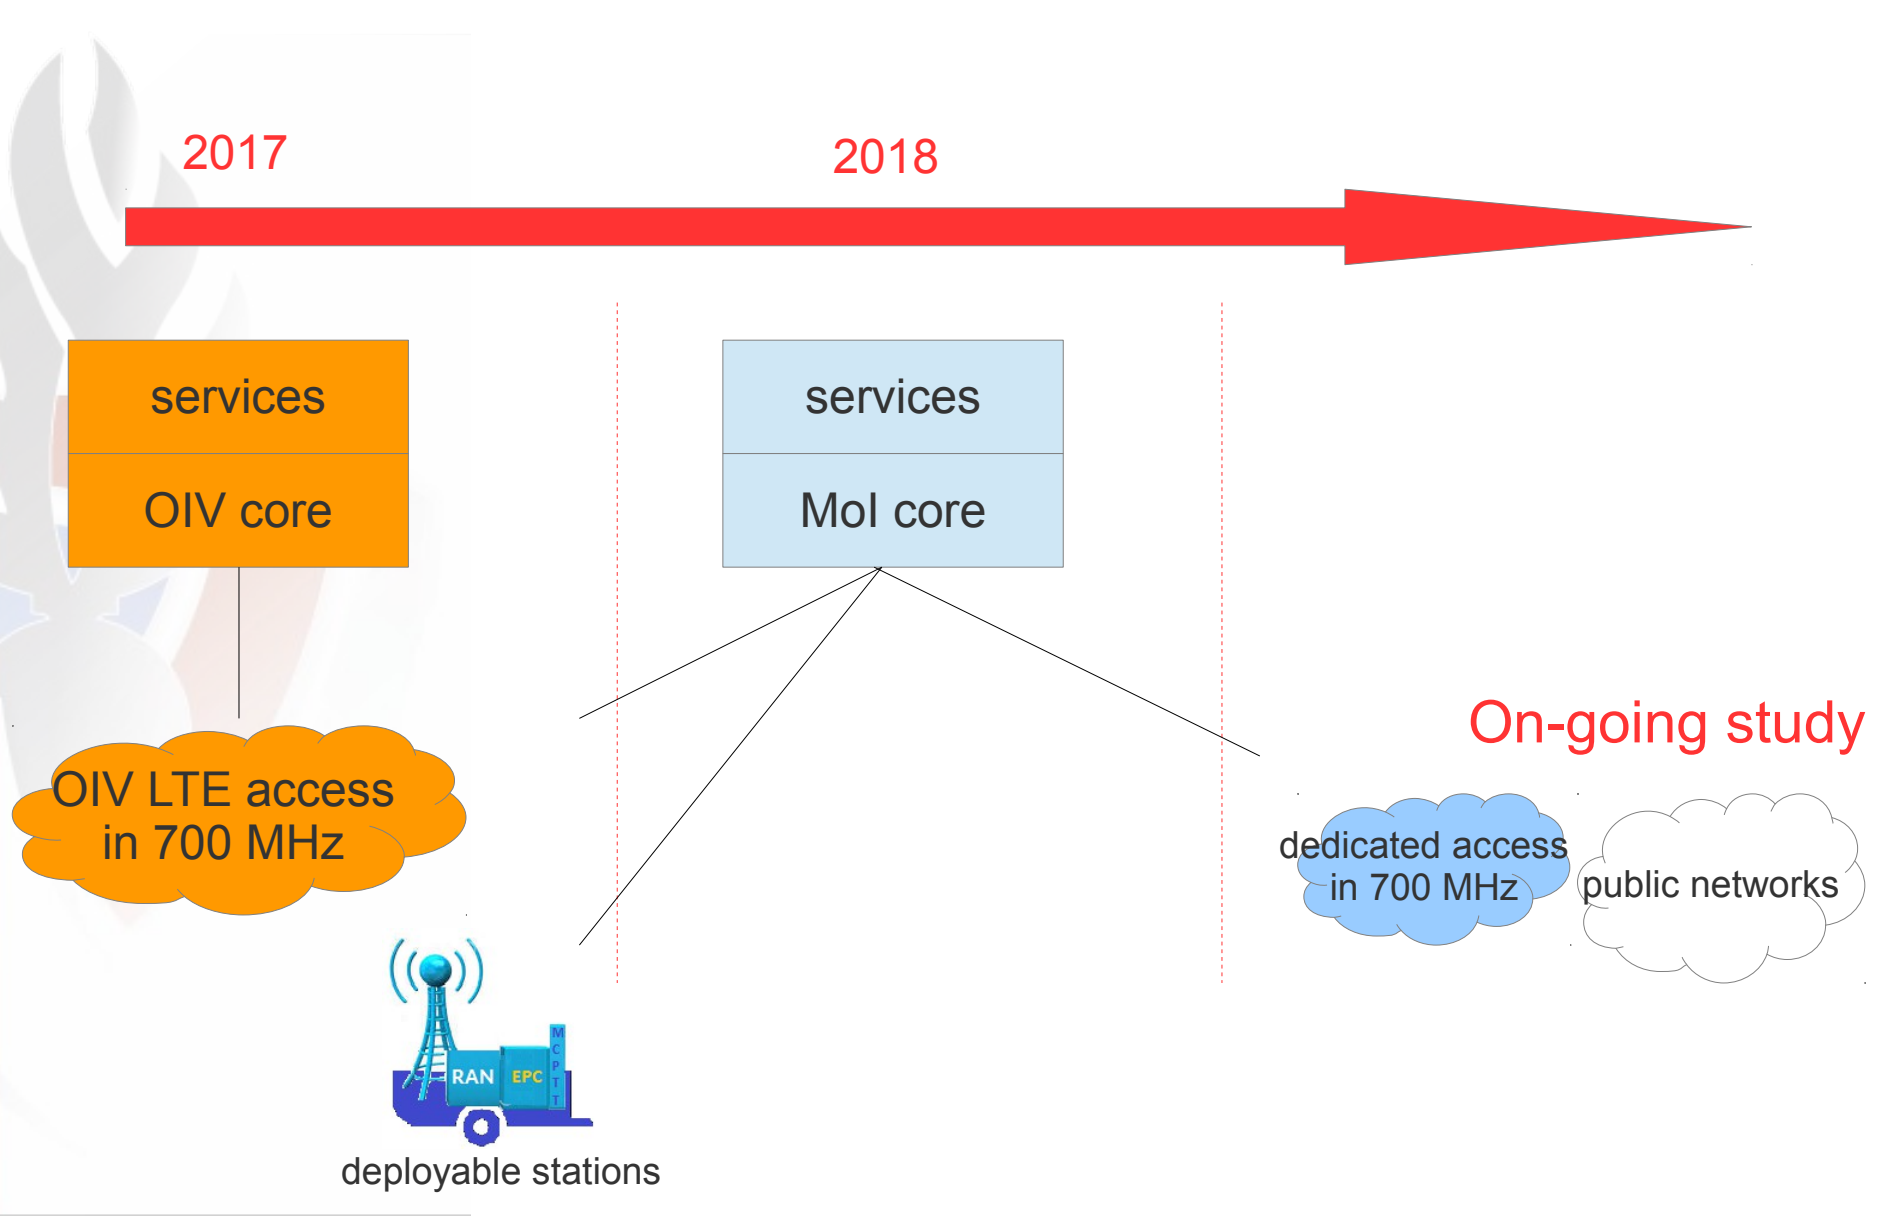

Public Safety in France

- **Some critical utilities (energy, transportation operators) contribute to public safety**
- **& are willing to roll-out broadband networks**

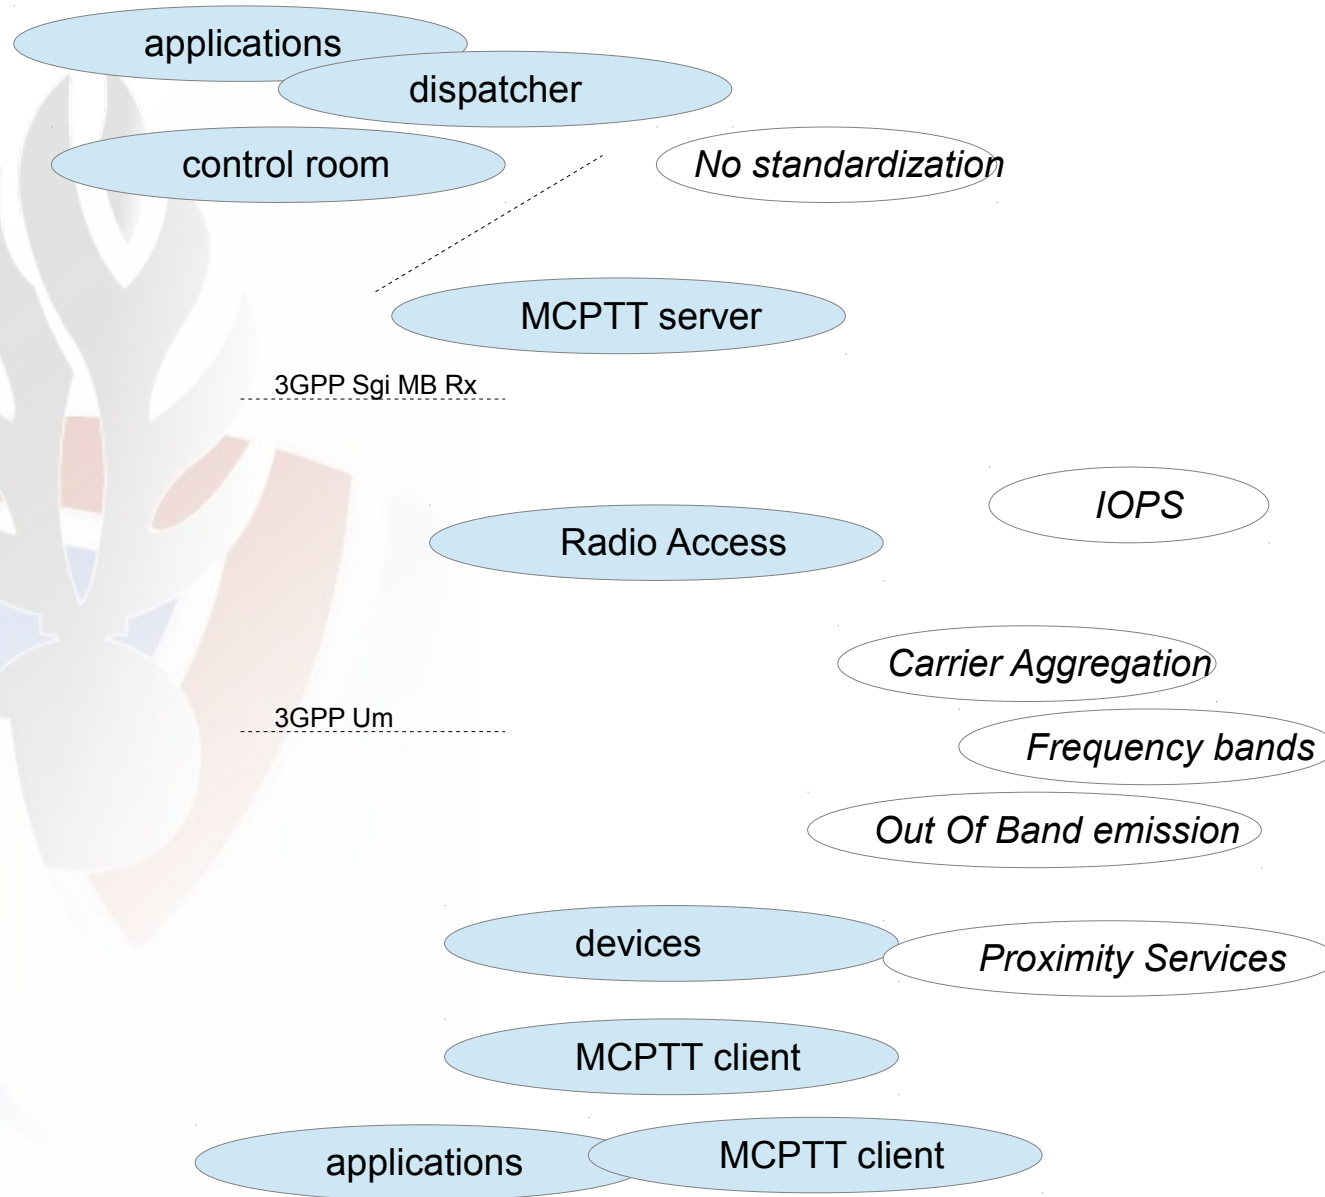

Agreement given on a case-by-case basis by Mol to use PPDR frequencies :

- in confined area**
- and for Public Safety usage**
