

What's in the Public Safety App Store?

David Lund

President, Public Safety Communication Europe (PSCE) Forum

www.psc-europe.eu

So we are used to our smartphones

Why can't we do that in our day job ??

- **Coffee and Collaboration**
- **Apps for the PPDR sector**
 - David Lund, PSCE, and
 - Laurence Claeys, iMinds, Digital Research and Business Incubator, Belgium

Split into groups and define

50 apps

- Original number of Apps in Paris - 50

- Original number of Apps in Paris - 50
- Refined number of Apps in Graz- 36

Define 50 Apps

Each Group chaired by End Users

at least 50 Public Safety Apps
that should be available
in a Safety Apps Store

Blue
Play
Uwe Kippnich

BLUE
SOUP
UWE
KIPPNICH

- volunteer app
- Augmented Reality
- Indoor location
- Situational awareness
- Down...
- T...
- L...

Uwe Kippnich

App management and organization

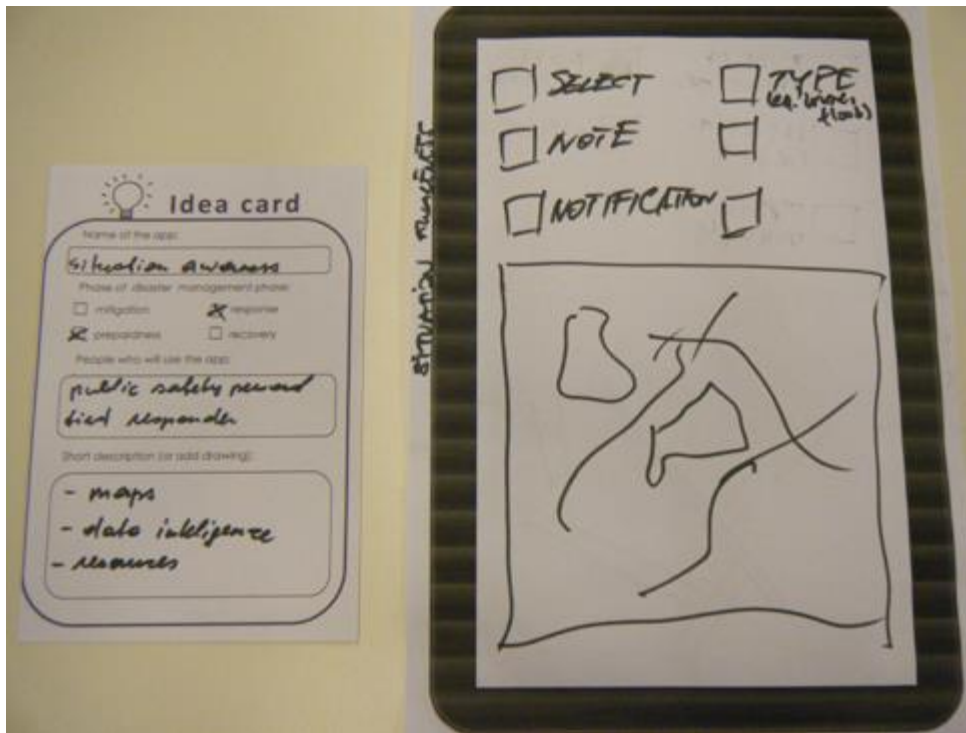

Citizen engagement

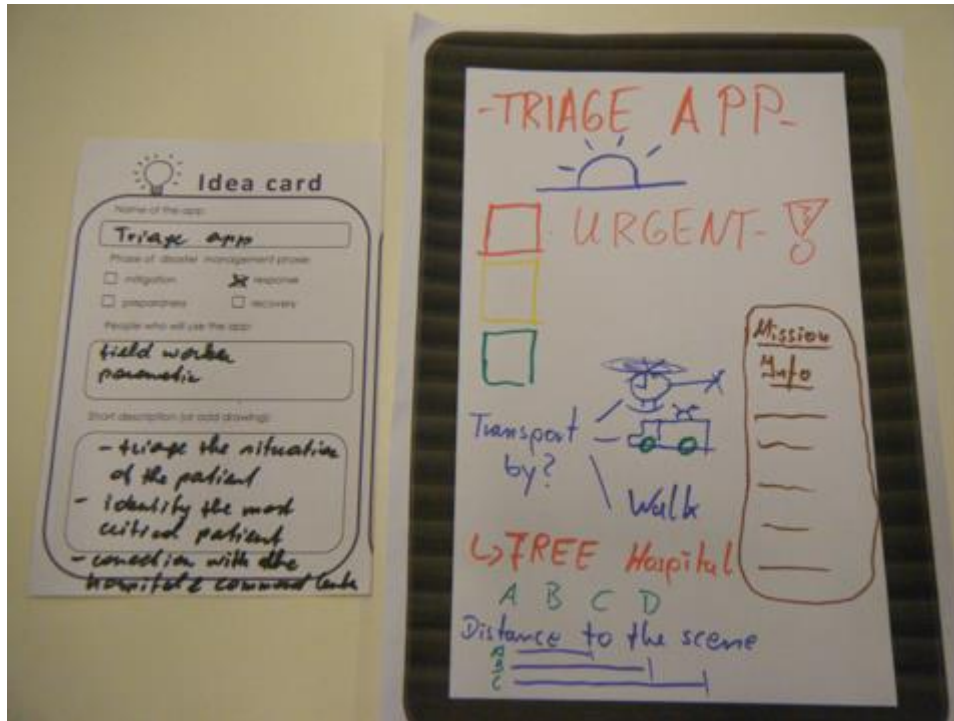

Crisis alert app

Situation awareness app

Triage app

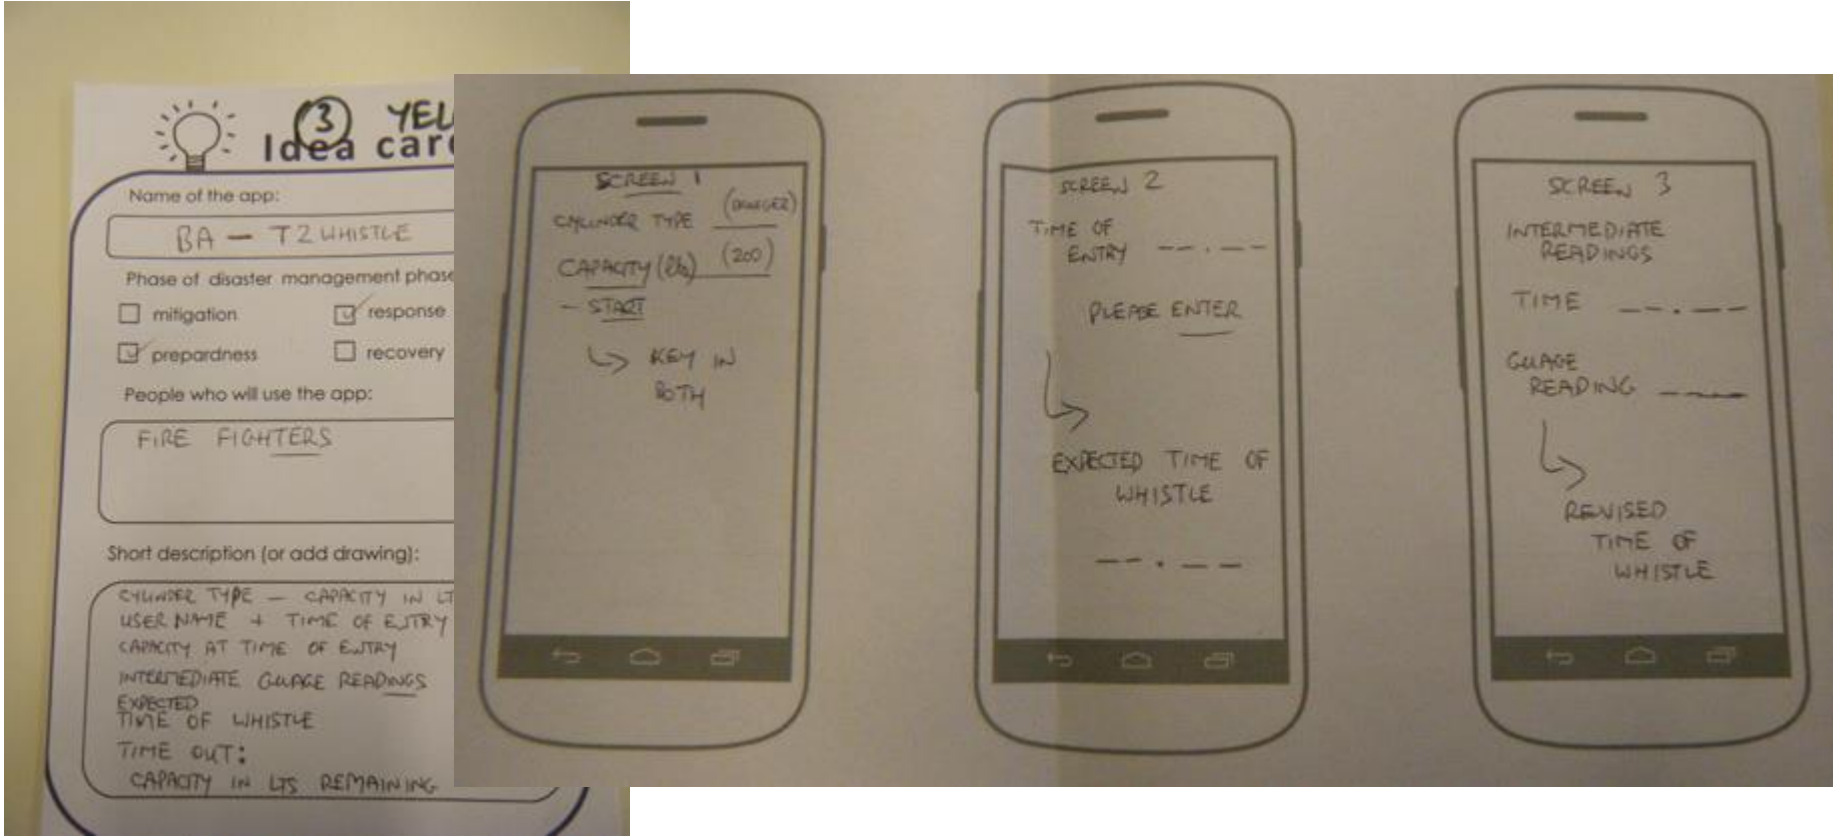

Hakan Marcusson & Finian Joyce

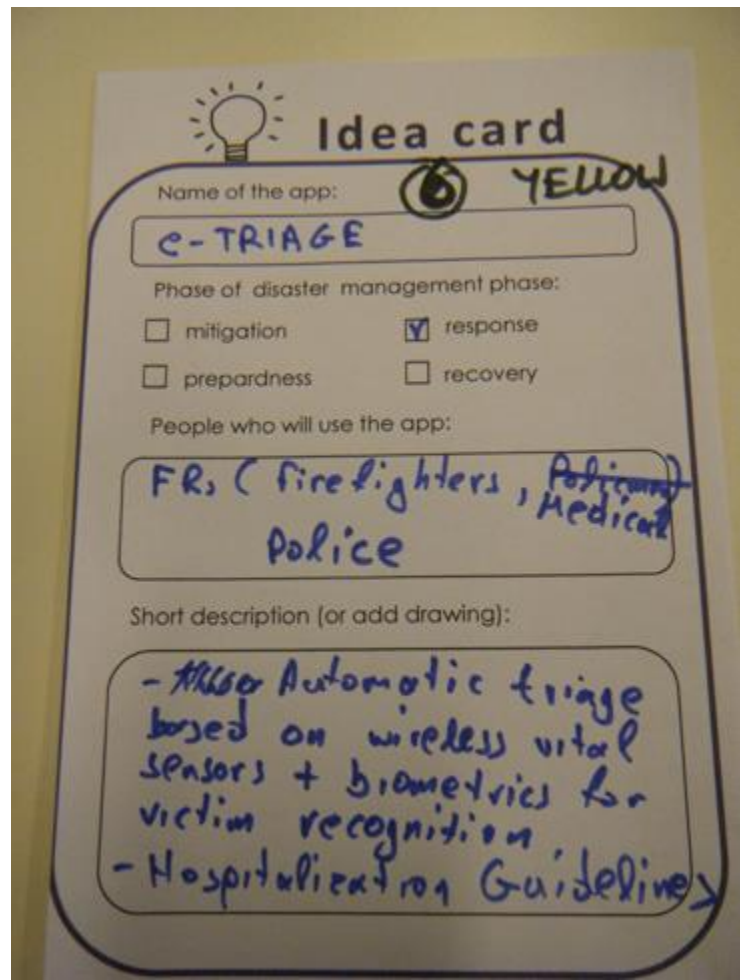

Around 10 people involved in this session
(names should be derived from the attendance list)

BA-T2 whistle

E-triage app

My personal evacuator

 **Idea card**

Name of the app: **① YELLOW**

My Personal eVacuator

Phase of disaster management phase:

<input type="checkbox"/> mitigation	<input checked="" type="checkbox"/> response
<input type="checkbox"/> preparedness	<input type="checkbox"/> recovery

People who will use the app:

Citizens / Security Forces

Short description (or add drawing):

- Personal evacuation instructions
- Shelter finder
- Optimized evacuation route guidance
- Map based

Reassure beloved

Vehicle incident telematics

 **Idea card** Yellow

Name of the app: **(15)**

Vehicle incident telematics

Phase of disaster management phase:

mitigation response

preparedness recovery

People who will use the app:

Police: In response to road traffic collision

Short description (or add drawing):

App will interrogate vehicle dynamics immediately prior to a collision and present them to Police: a "Blade Box" for cars. An evolution of OnStar / Ecall functionality.

Where is the response

(16) YELLOW
Idea card

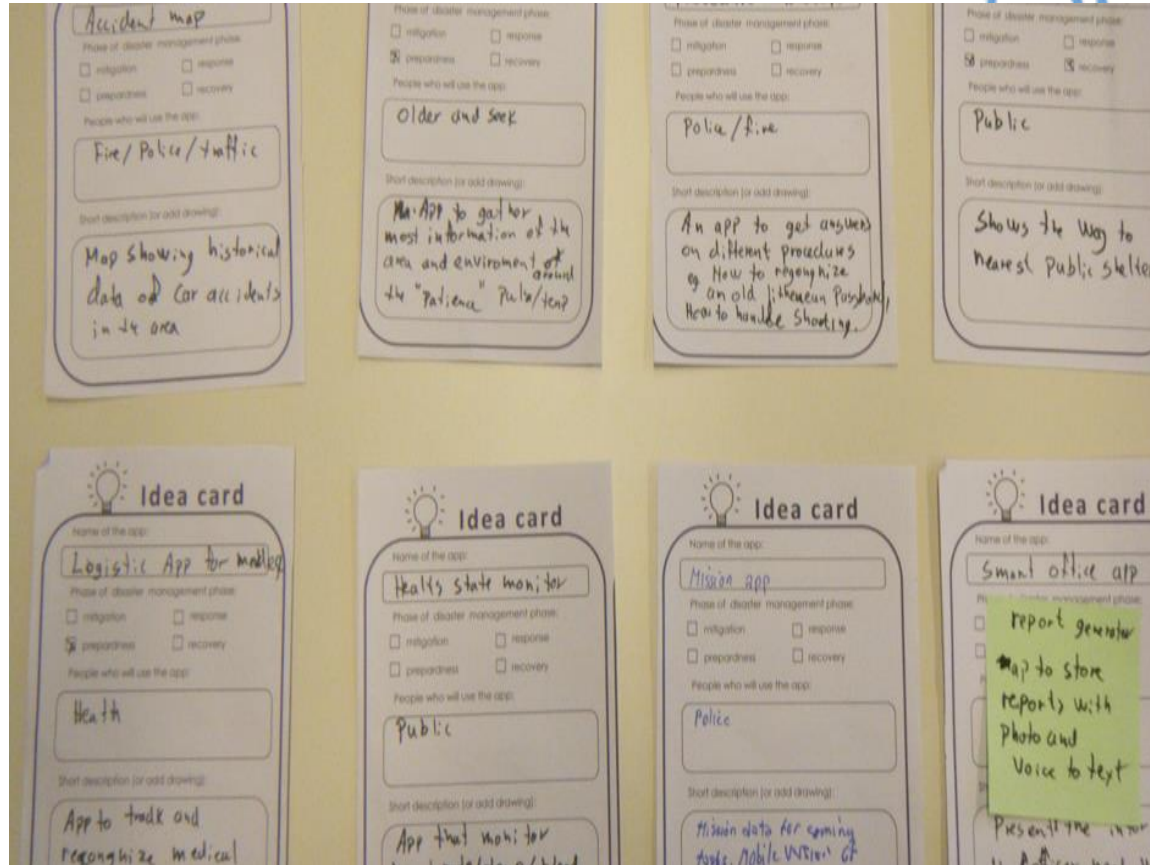

Name of the app:
WHERE ARE THE RESPONSE

Phase of disaster management phase:
 mitigation response
 preparedness recovery

People who will use the app:
ALL SERVICES / PUBLIC

Short description (or add drawing):
**SHOWING LOCATION OF OTHER
VARIABLE RESOURCES ON THE WAY
TO THE SCENE/ACCIDENT IN
A MAP IN REAL TIME**

Geir Myhre

Crowd movement app

 **Idea card**

Name of the app:

Phase of disaster management phase:

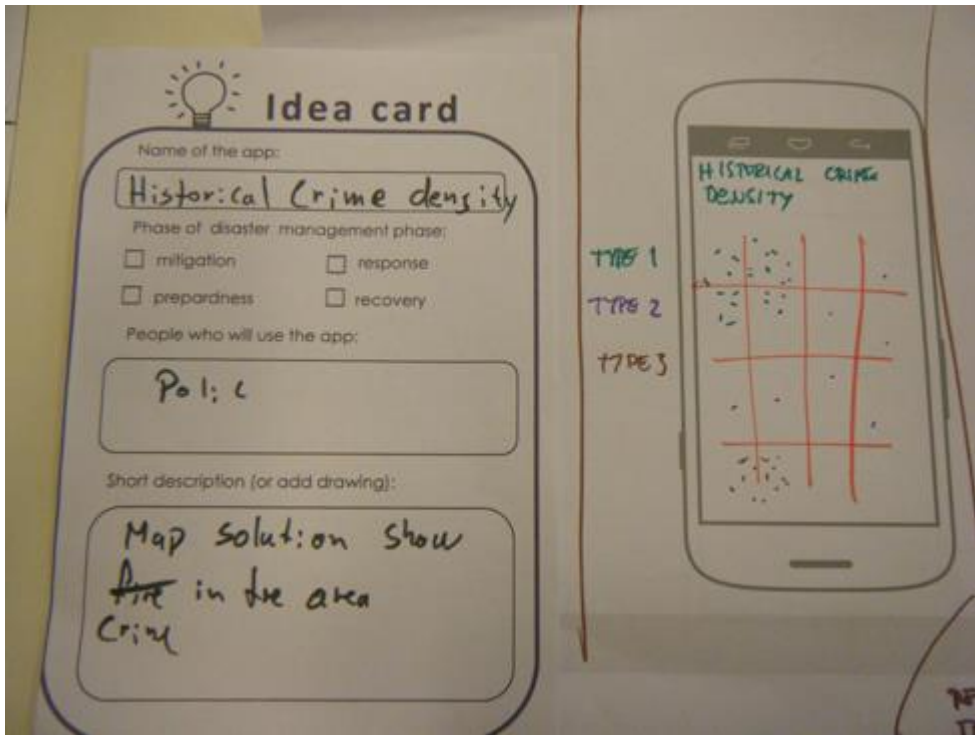

<input type="checkbox"/> mitigation	<input type="checkbox"/> response
<input checked="" type="checkbox"/> preparedness	<input type="checkbox"/> recovery

People who will use the app:

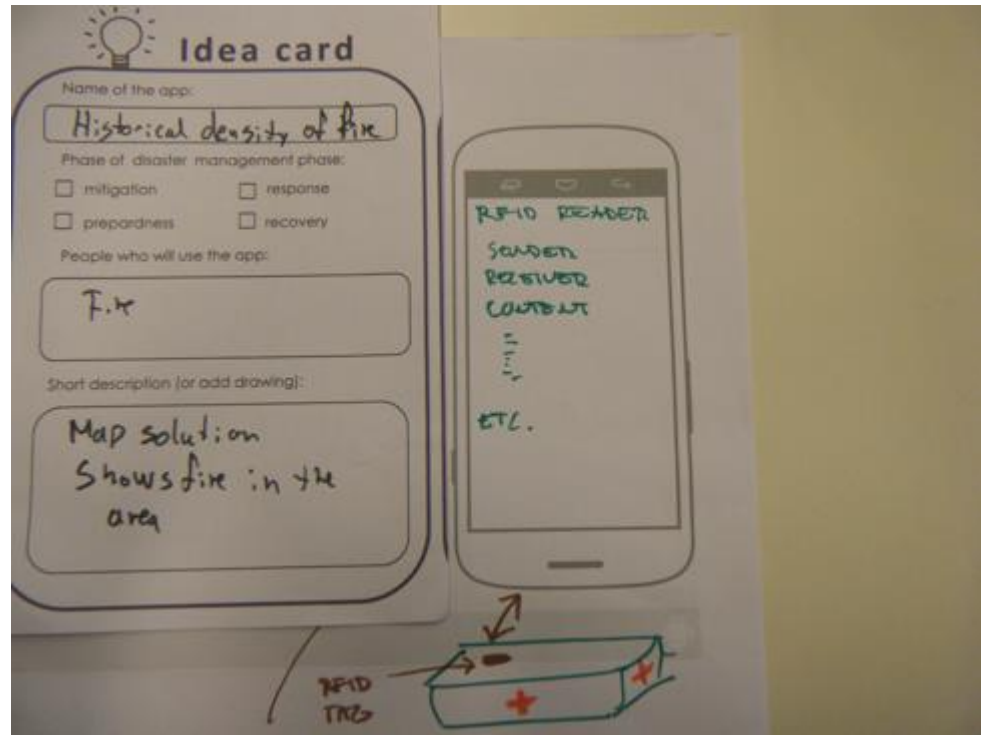

Short description (or add drawing):

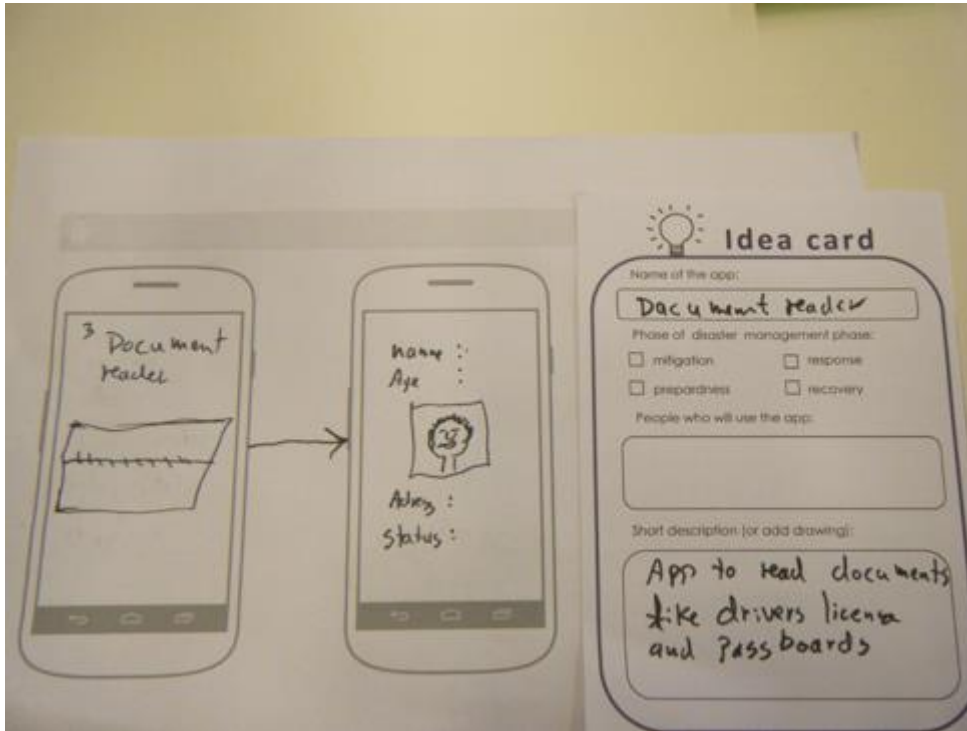

Historical crime density map

Historical density of fire map

Document reader app

Mobile field office app

Finger print reader app

Face recognition app

Kari Juntilla

- **Coffee and Collaboration**

Realising Critical Broadband Apps

?????

What information does this app use, gather or produce?

Where is the information sourced?

What type of device will this app run on?

Is the information freely available, or obtained commercially?

Is the app sensitive to:

Latency

Available bandwidth

Data transfer set up time

Etc.

Is the information used sensitive or classified?

Who should approve this app, and using what criteria?

- No approval needed
- Approval of
 - Accuracy of information
 - Timeliness of information
 - User Interaction
 - Other Aspects

Does the app require low, medium or high levels of information processing?

Can you anticipate barriers to adoption of this app?

Are there innovation gaps to impede availability of this app? Does it already exist?

Original Number of Apps

in Paris - 50

Refined Number of Apps

in Graz- 36

Key Common Topics

7

Key Common Topics

- App Store
- Mobile Field Office
- Mission and GIS Apps
- Citizen Engagement
- Equipment Monitoring
- Infrastructure Interfacing
- E-Training

- Key actors represented
 - Police, Fire, Medical, Mountain Rescue, Citizen

- Key actors represented
 - Police, Fire, Medical, Mountain Rescue, Citizen
- Mostly representing the response phase,
 - less so - prep and recovery

- App Store (1)
 - Apple Store, Google Play
 - Could/Would they deliver
 - Responsibility, Assurance
 - Approvals
 - Internal
 - External
 - Guidance on the most appropriate app to use

- Mobile Field Office (27)
 - Document Reader (21)
 - Procedure Handbook (36)

- Mission & GIS Apps (12, 19, 28, 29)
 - Accident Maps (4)
 - Preparation
 - Physical (Building and Terrain) Maps/Plans (5)
 - Crowd Movement (3)
 - Crime Density (9)
 - Historical Density of Fire (15)
 - Mountain App (17)
 - Localisation of Victims
 - Weather
 - Avalanche Forecast
 - Rescue info
 - Medical Response (11)
 - E-Triage (2,25,34)
 - Where is the response (31). Availability of resources (skilled personnel , etc).
 - Patient medical data telemetry, Health Stat Monitor (16)
 - Video streaming – ambulance head up display, traffic cameras
 - Traffic for transport routes

- Citizen Engagement (7)
 - B-Awareness (18)
 - bystander data collection from incident
 - Situation alerts to citizen
 - B-Prepared (24)
 - Reassure Beloved (20)
 - Panic Button (22)
 - Situation App for Citizen (23)
 - Nearest Public Shelter (33)
 - Crisis Data (13)

- Equipment Monitoring
 - BA-T2 Whistle (8)
 - Vehicle Incident Telematics (26)
 - Gun app (32)

- Infrastructure Interfacing (Smart Cities)
 - Traffic Light control (10)
- E-training (30)
 - Standard Ops, illustrative examples
 - Reflective scenarios

Graz Analysis

- Sensitive total – 21 say yes (at some stage)
- Some apps mixed, **different information has different requirements**
 - E-triage (2,25,34)
 - Crowd Movement (3)
 - Accident map (4)
 - Map App (5)
 - App Siren (6)
 - Citizen engagement (7)
 - Historical Crime Density (9)
 - Traffic Light App (10)
 - Med app (11)
 - Awareness App (12,19)
 - Historical Density of Fire (15)
 - Health Stat Monitor (16)
 - Mountain App (17)
 - Where is the response, Situation awareness (19,31) – availability of resources
 - Document Reader App (21) – depends on type of doc
 - Procedure Handbook (36)
- Not sensitive
 - Those related to preparedness, (or those considered not necessarily interesting to others)

- High bandwidth
 - Crowd Movement (3)
 - Med app (11)
 - Awareness App (12)
 - Crisis Data (13)
 - My Personal Evacuator (14)
 - Historical density of Fire (15)
 - Document Reader App (21) – depends on type of doc

Graz Analysis

- Low bandwidth
 - E-triage (2,34)
 - Health Stat Monitor (16)
 - B-prepared (24)
 - Where is the response (31)
 - Nearest Public Shelter (33)

- Timeliness
 - E-triage (2,25,34)
 - App-siren (6)
 - Citizen Engagement (7)
 - Traffic Light app (10)
 - Med App (11)
 - Awareness App (12)
 - Crisis Data (13)
 - My Personal Evacuator (14)
 - Reassure Beloved (20)
 - Situation App for Citizen (23)
 - Where is the response (31)

- Barriers to Adoption
 - Sensitivity
 - Data Protection
 - Ownership/Cost of information (Satcom)
 - Interoperability between blue light
 - Citizen adoption – citizen apps
 - Rich sources of data
 - Lack of widespread adoption of wearable's (Health stat monitoring)
 - Driver distraction
 - User acceptance – preference for printed maps
 - No high level of Thematic accuracy

- Innovation gaps
 - Some apps exist and already available
 - Bandwidth
 - Shifting apps in control room to mobile
 - Civil Protection and Security Organisations don't want to share information

- Devices
 - Smartphones
 - Tablets (mobile and vehicle mounted)
 - Wearables (health stat and e-triage)
 - COTS, hand held device
 - TETRA quoted twice

Graz Analysis

- Information sources
 - Existing databases
 - INSPIRE data
 - Earth Observations
 - Drones
 - Equipment (BA-T2)
 - Citizens
 - Medical devices
 - Wearables

- A good representation of views of the community
 - End Users
 - Industry
 - Research

Other organisations are doing this
Lets join forces next year

Future coffee and collaboration

- Brussels, May '16
 - ????
- Athens, Nov '16
 - ????

Small groups 4-5

Don't let anyone hide

8 New Q's

- What would your 4G device look like?
- What happens when the technology doesn't work and lets you down?
- What would you anticipate would cause the new broadband technology to fail?
- Do you have any concerns surrounding the increased volume of information?
- How often will we need to use this technology in a cross border situation and in our daily business?
- What challenges do you expect with regard to interoperability?
- Following the prospect of 5G, do you think the PPDR community should play an active role in driving the 5G agenda?
- Are there any other burning areas or topics that PSCE should help you to learn about, or develop a consolidated view on, in the coming year?

Today

Fill a Post-it, and post-it

Thank you !

Thanks for Listening
