Brokerage Event

Oxford – December 8, 2015

Topic: SEC-19-BES-2016: Data fusion for maritime security applications

Juha S. Knuuttila

Turku University of Applied Sciences, Finland

juha.s.knuuttila@turkuamk.fi

Motivation:

Improving situational awareness and data utilization possibilities for the end-users operating at EU external borders, partly by building upon earlier related EU projects

What we have:

- Extensive expertise from maritime technologies, ship building and safety & security
- Wide end-user, researcher and industrial networks globally
- Connections to related previous projects like FP7 PERSEUS

What we are looking for: New partners and / or a consortium to join
