

Introduction to the UK Multi-Agency Interoperability Programme

*“Unifying communications
to increase public safety”*

Michael Hallowes

Detective Chief Superintendent
NPIA Head of Strategic Operations
Director, UK Multi-Agency Interoperability Programme

Topics

Communications Interoperability

- **Why we need to improve**
- **When it's needed**
- **Requirements**
- **Common Operating Picture**
- **UK Interoperability Continuum**
- **Partnership opportunities.**

NPIA: Making a unique contribution to public safety

**Specialist Training:
Search, Firearms &
Investigation**

**Interoperable
Fixed & Mobile
Communications**

**Identity Assurance
Information & Intelligence
Systems & Biometric Databases**

**Recruitment
Selection & Promotion
Exams & Assessment
Leadership Training**

Police National
Network**

**Neighbourhood
Policing Programme**

**Automatic Number
Plate Recognition &
National ANPR
Data Centre**

How can the Specialist Operations Centre assist you?

Last year the NPIA's Specialist Operational Support Unit assisted police forces with over 10,000 enquiries

The NPIA's Specialist Operations Centre offers you advice and support on:

- Current policing
- National and local enquiries
- Regional and local enquiries
- Operational planning and public order
- Disaster management
- Welfare and all other
- National and local enquiries
- NPIA National Operational Support Unit
- Advice to other units and public order support teams

INVESTOR IN PEOPLE

Interoperability is...

“The capability of organisations or discrete parts of the same organisation to exchange operational information and use it to inform decision making.”

Vision

Increased public and personnel safety through improved multi-agency communication and co-ordination. *by 2011*

Predicated on assessing accurately threat, risk and harm, and working together in a safe and effective response.

www.npia.police.uk

INVESTOR IN PEOPLE

Why ?

Organisational learning - all hazards approach

Organisational learning

Without planned interoperability...

- **Improvised business processes**
- **Slower deployment of capabilities**
- **Lack of clarity for operational staff**
- **Disconnect between command levels**
- **Decisions made in isolation**
- **Inaccurate briefings to personnel**
- **Incomplete messages to public.**

Strategic impact on public / responder confidence

Organisational learning

Common understanding of the situation and each other's capabilities to respond

Courtesy of Guardian Newspapers

2007 UK Floods

When ?

It adds value by:

- **Increasing safety**
- **Alerting people to immediate hazards**
- **Supporting decision-making either at an individual level or as a collective group**
- **Contributing to a common understanding and awareness of the situation, and**
- **Improving at incident co-ordination.**

Requirements ?

- **Common standards**
 - **Common radio platform / network**
 - **Compatible data exchange technologies**
 - **Common language and symbols**
 - **Direct Electronic Incident Transfer**
 - **Common Operating Picture**
 - **Scalable: local to regional to national**
 - **Scalable: emergency to disaster**
 - *Affordable !*
- = communications interoperability utopia.**

Context

Economic constraints

- **Necessary**
- **Sufficient**
- *Affordable*

“Transformational Government”
Re-use and optimise existing
investments in technologies

Cultural

- **National solution but not
national services.**

49 Fire Brigades
15 Ambulance Services
55 Police Services

Scope

- **Category 1 and 2 Responder Agencies**
- **Armed Forces (MACA / MACP)**
- **Commanders and Managers**
- **People, Processes and Systems that optimise use of enabling Technologies.**

**THE CHIEF
FIRE OFFICERS
ASSOCIATION**
The professional voice of the
UK fire and rescue service

Initialisation**

**Build the
"Common
Operating
Picture"**

**Developing and
executing tactical
plans within agreed
strategy**

Common Operating Picture

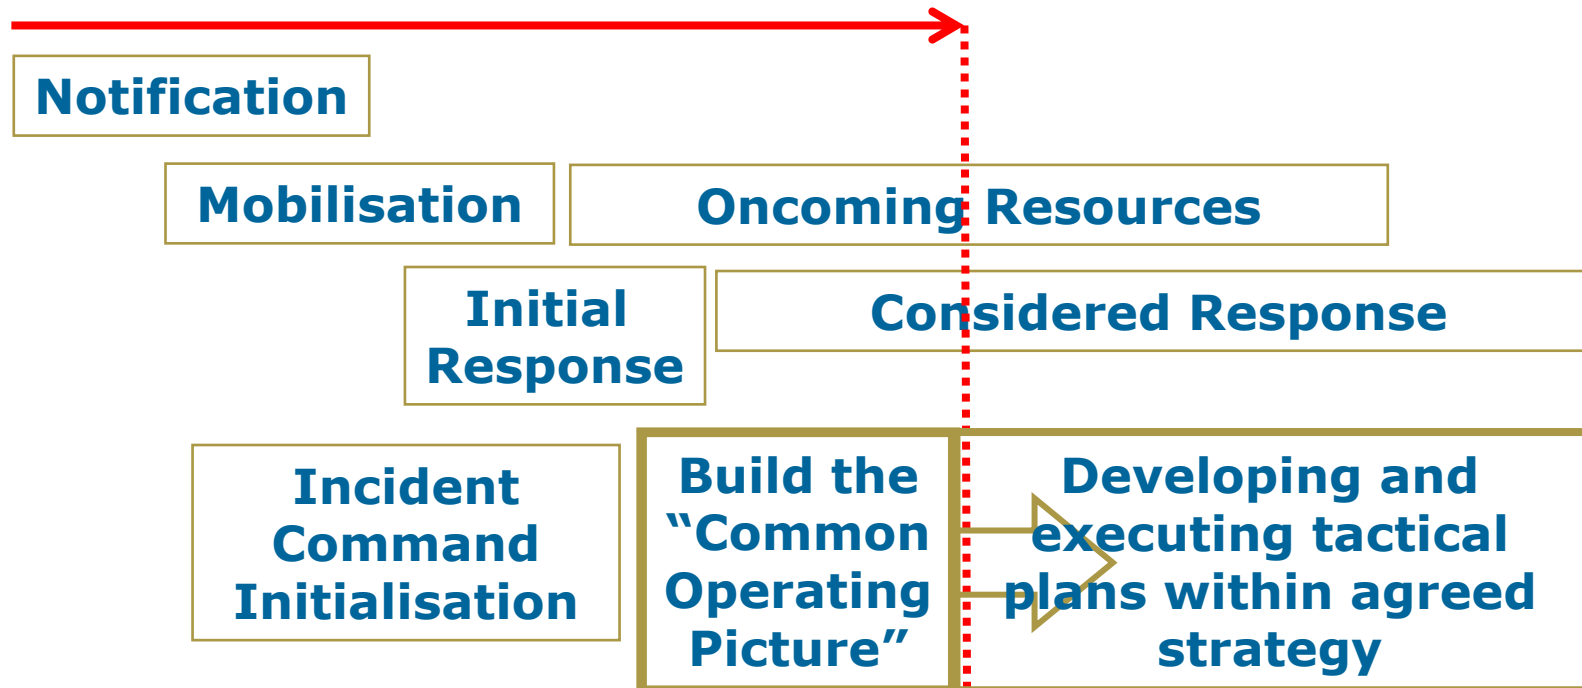

Filtered, operationally relevant information

“Display of relevant operational information collected from and shared by more than one agency or organisation that contributes to a common understanding of a situation and its associated hazards and risks along with the position of resources and other overlays of information that support individual and collective decision-making.”

Typical incident lifecycle: Current capabilities

55 minutes +

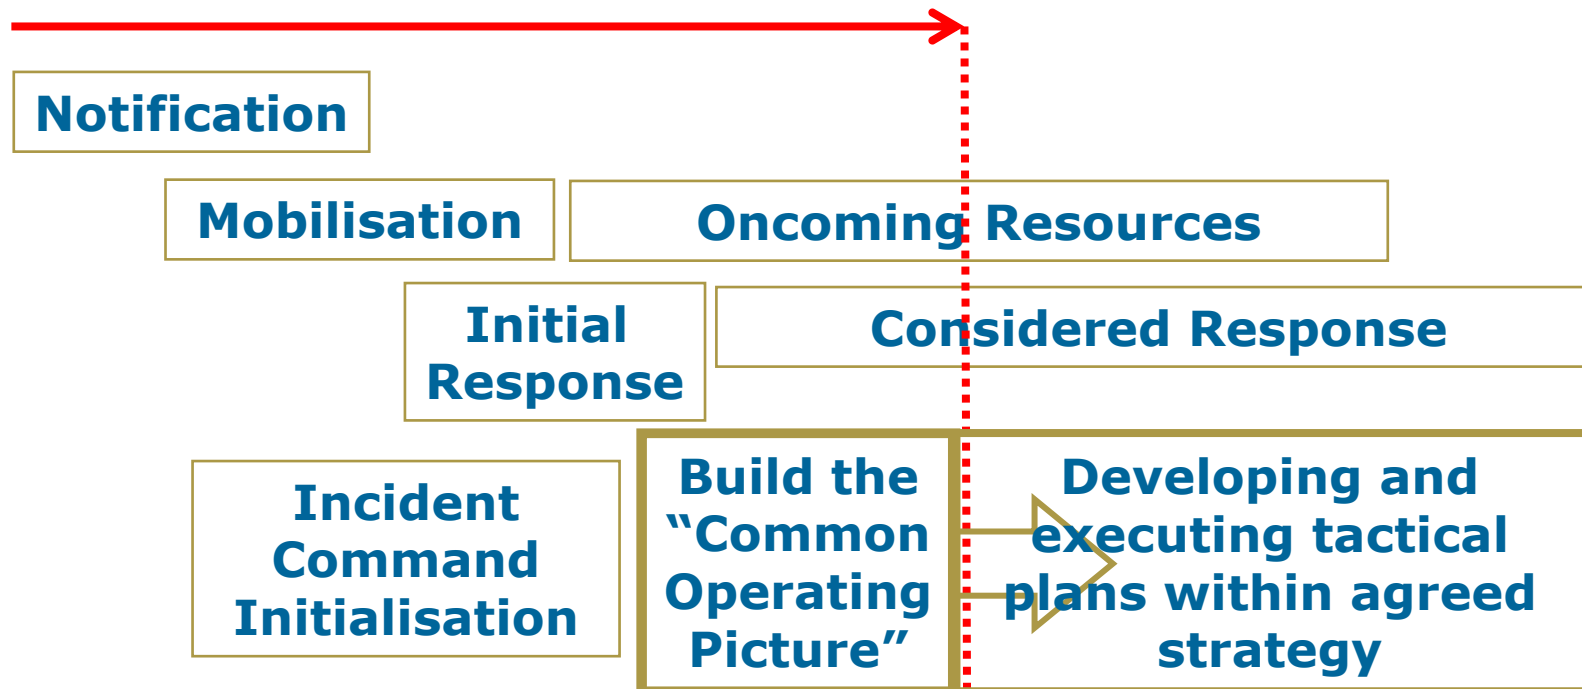

Information vacuum

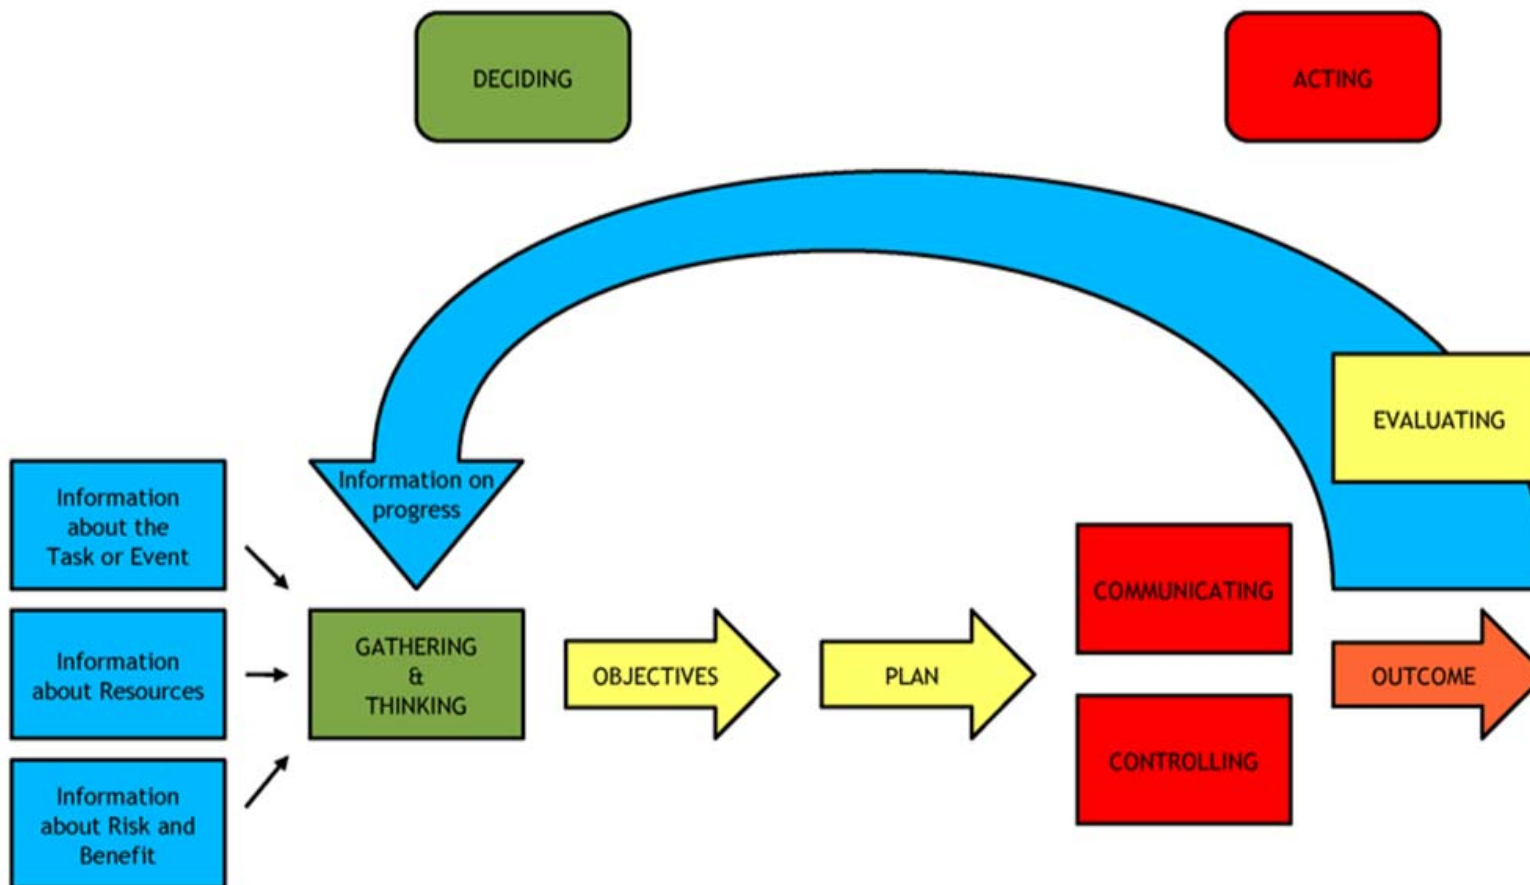

Typical incident lifecycle: Desired capability

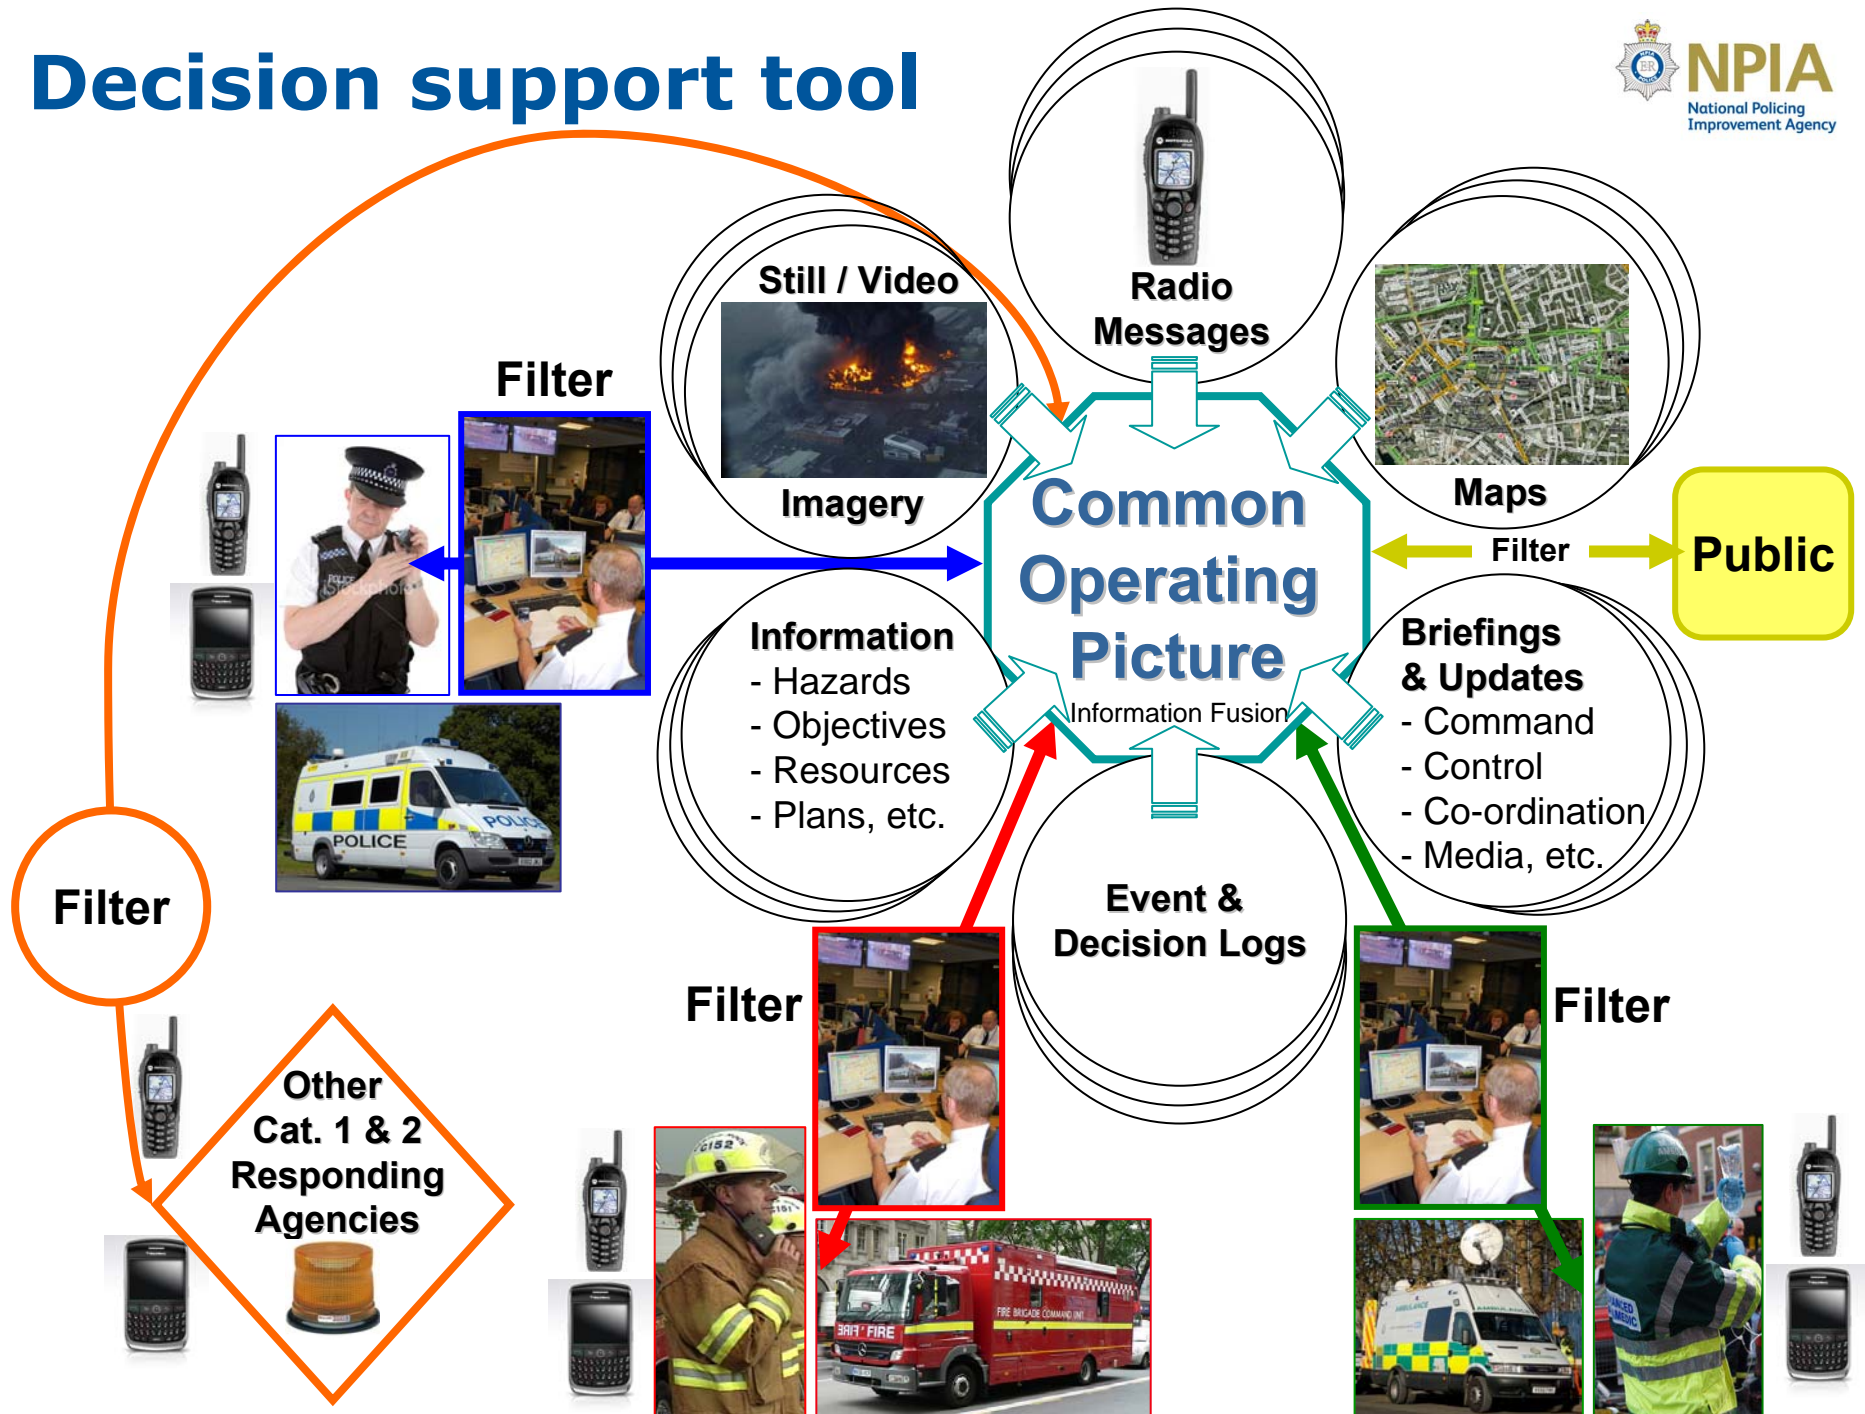

20 minutes

Decision-making model

Decision support tool

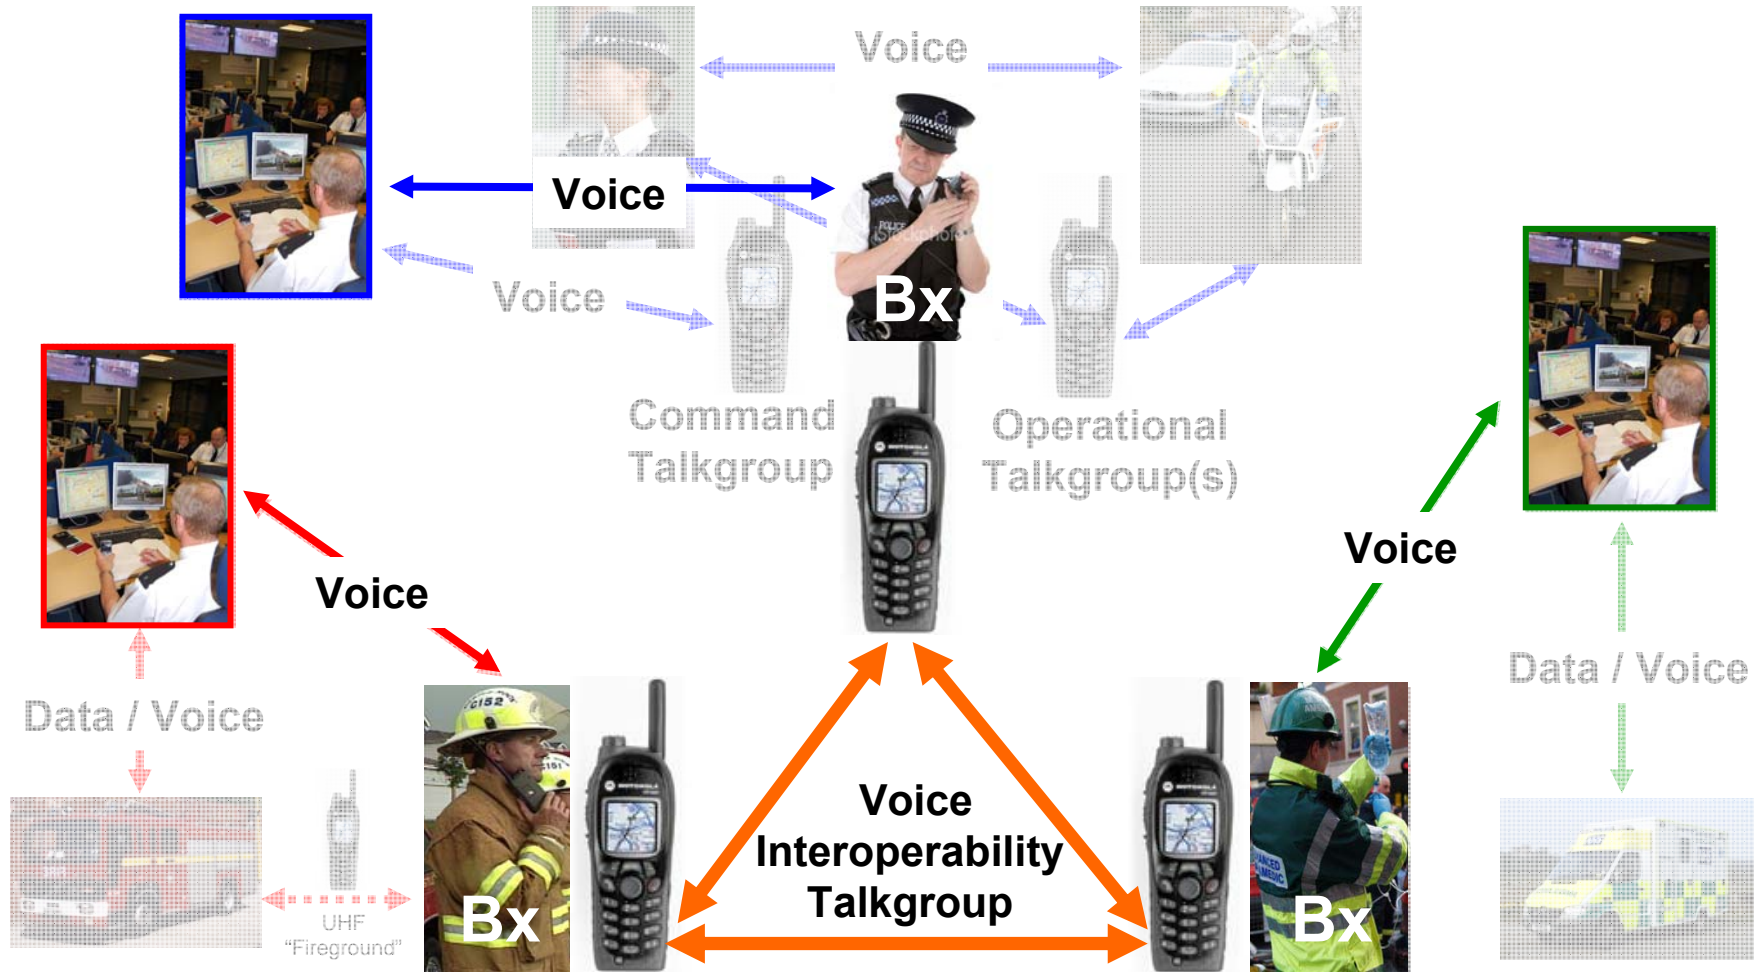

Voice & Data interoperability: Common Operating Picture

Direct Electronic Incident Transfer (D.E.I.T.)

Airwave interoperability between Agency commanders

Airwave in London Underground

Radio Interoperability

- **Process & Systems**
 - Common standards

- **Technology**
 - Capacity

- **People**
 - Joint training

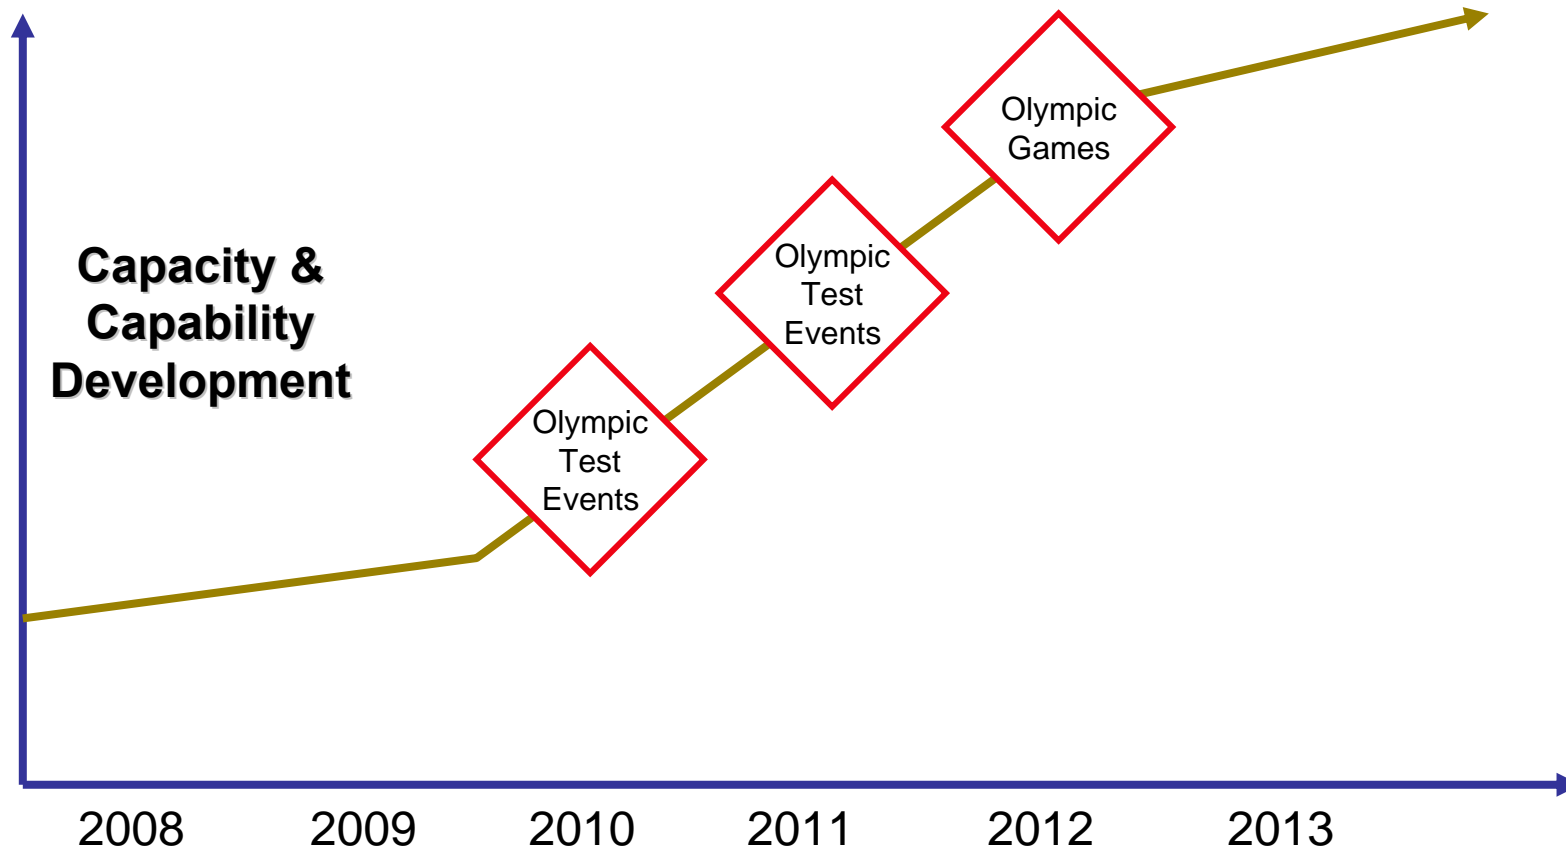

Programme deliverables

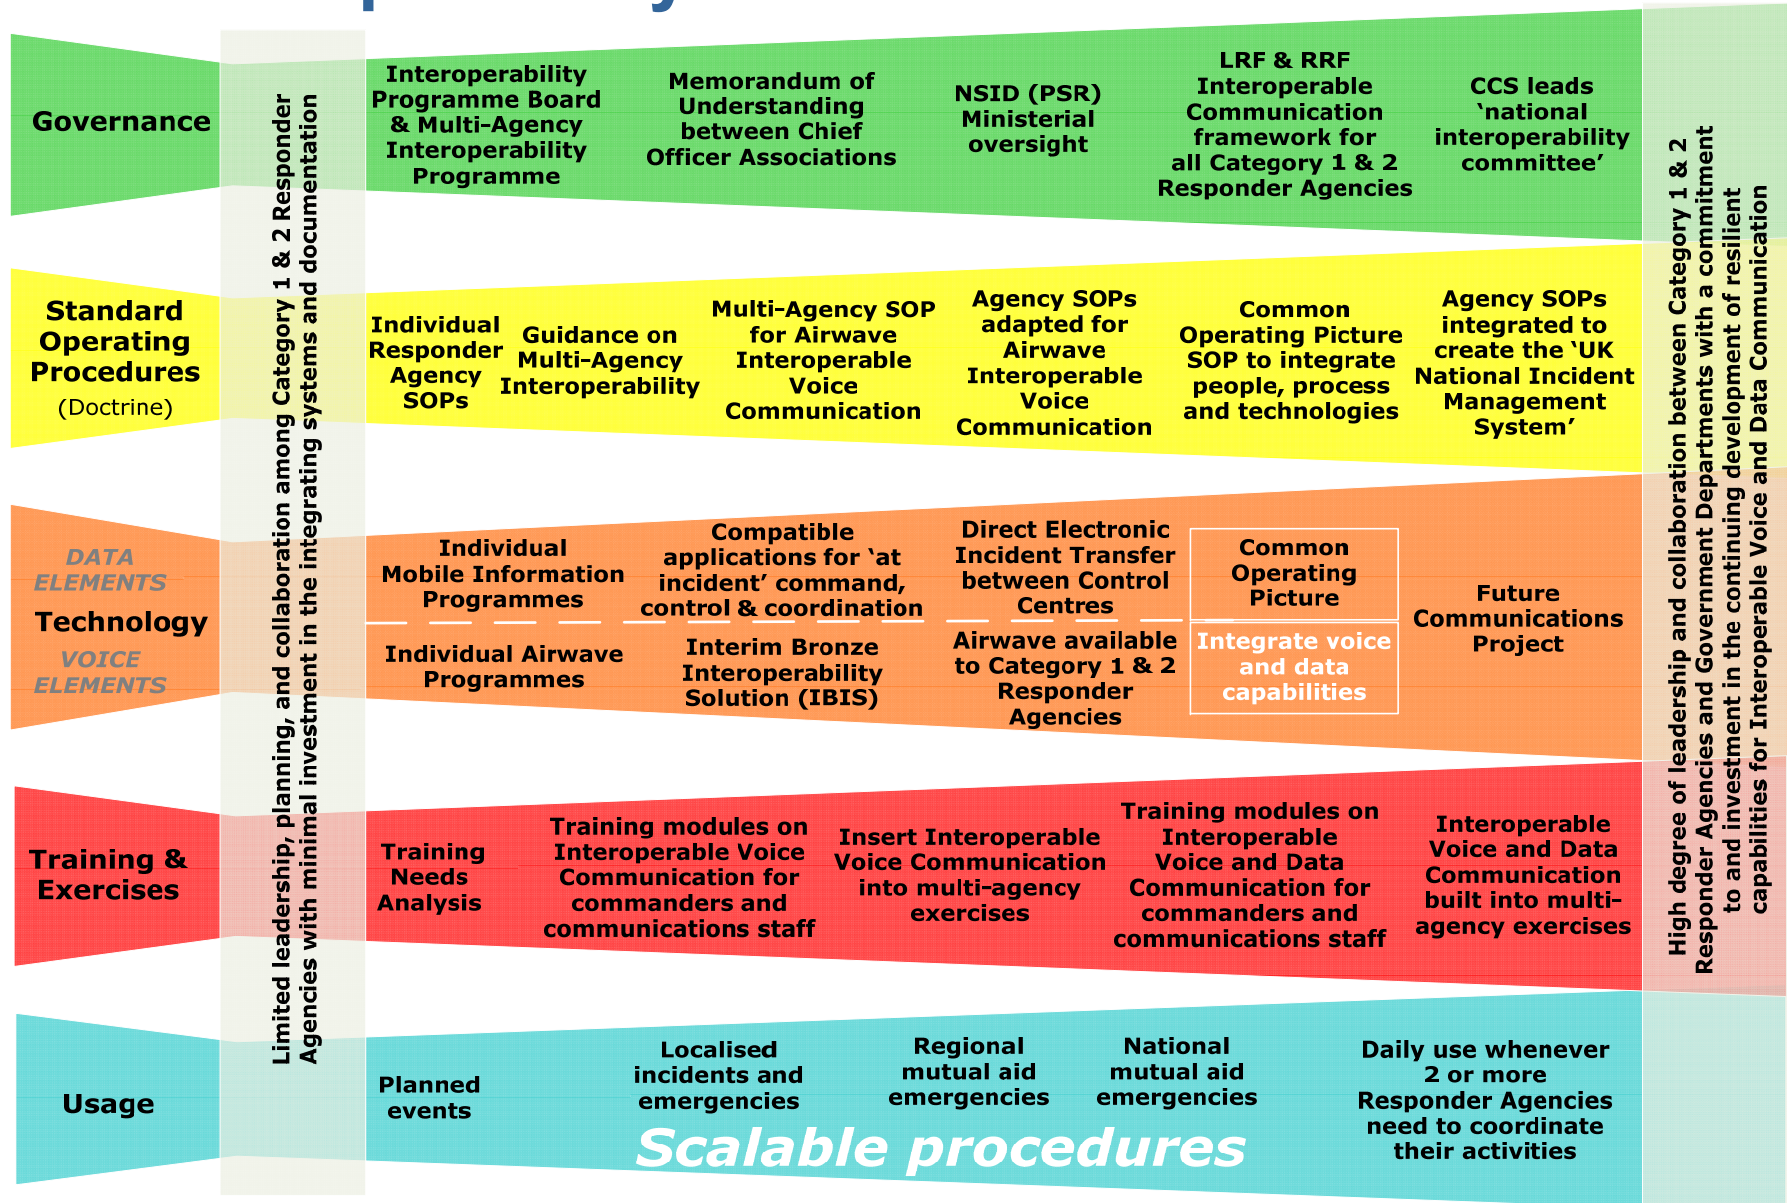

- ✓ **Tri-Service User Requirement and MoU**
- ✓ **Guidance on Multi-Agency Interoperability**
- ✓ **SOP Guide on Multi-Agency Airwave Interoperability**
- 2010 **D.E.I.T. requirements and solutions**
- 2010 **Identify Common Operating Picture requirements and capabilities**
- 2010 **SOP Guide on Multi-Agency Data Interoperability**
- 2010 **Joint training, exercising and implementation.**

Interoperability check-points

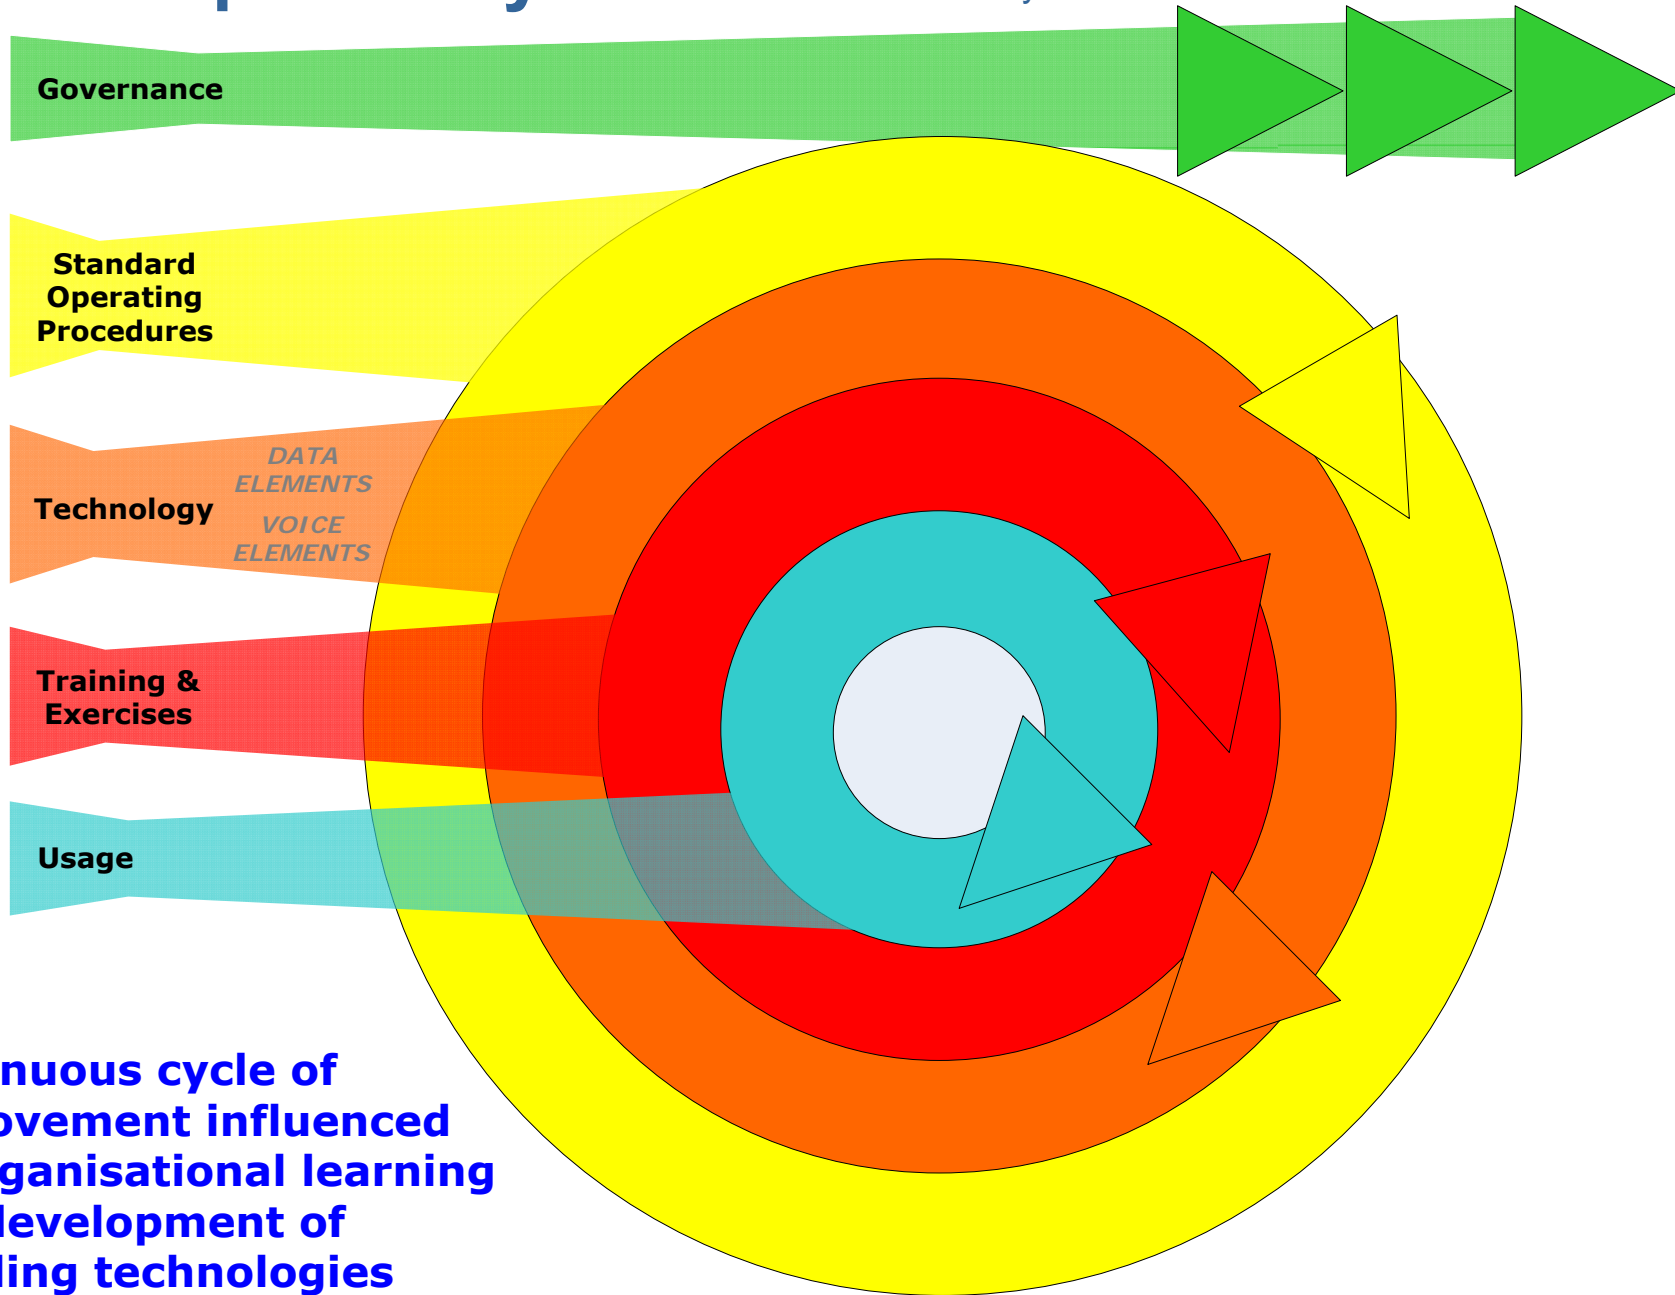

UK Interoperability Continuum

Minimal Level ←————→ Optimal Level

UK Interoperability Continuum beyond 2012

What does success look like ?

- **National implementation by 2011**
- **Interoperability is business as usual**
- **Common Operating Picture in use daily**
- **Common command culture**
- **Harmonised people, processes and systems, and technology**
- **Increased public and personnel safety.**

Working in partnership

**Collaborating to accelerate
the pace of change**

**Who's got the lid with the picture
to the jigsaw puzzle box ?**
