

The government stakeholders in Public Safety Communications

The levels:

The expertise: Planners

The expertise:

ICT (IT systems
and electronic
communications)

The expertise: Operations

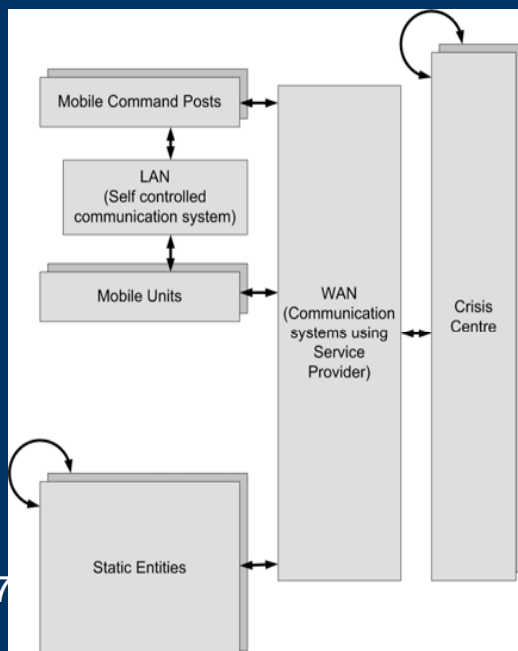

Convincing versus Training

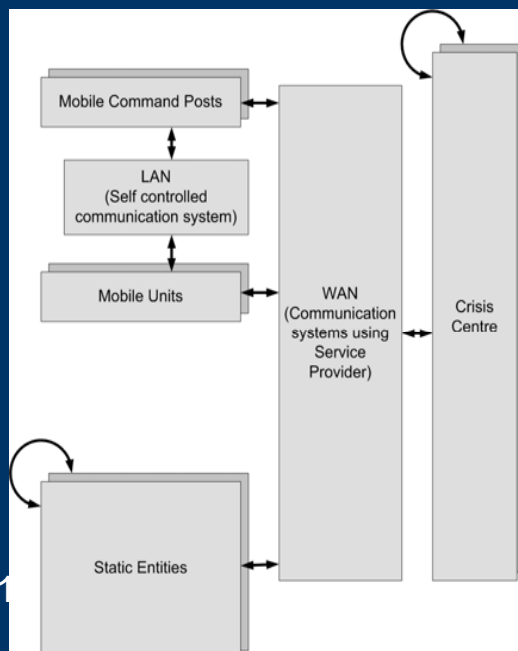

Planners Strategic

Politicians and high level advisers in Public safety (all topics)

ICT Strategic

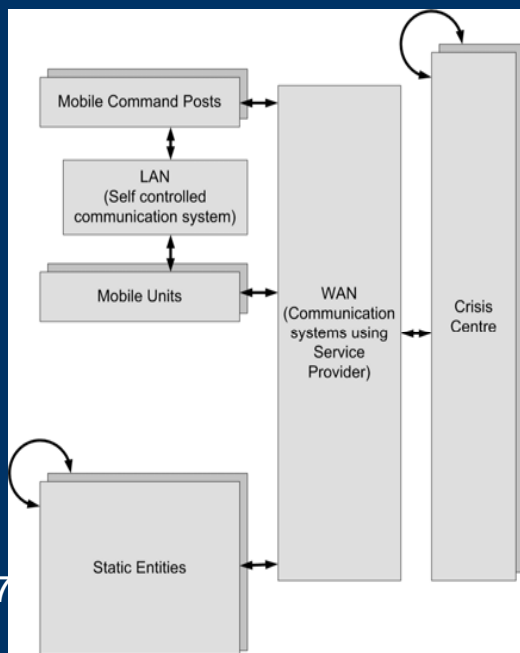

(+)

National experts in Information and communication technologies

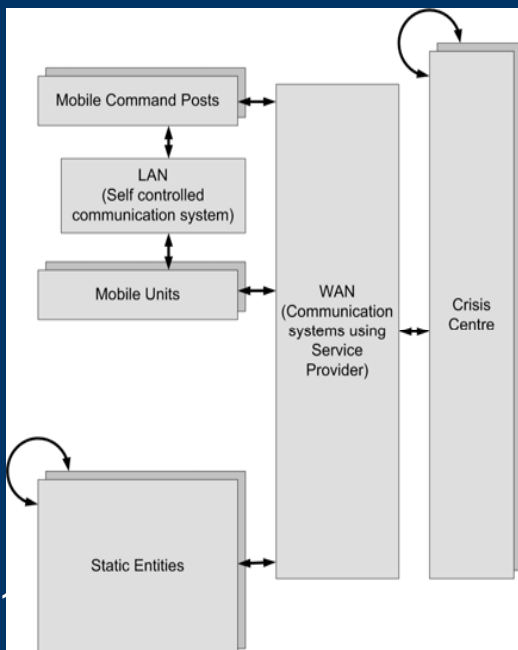

Operations Strategic

Crisis managers
Commanders of
Police, Rescue, Fire
etc...

Planning operational

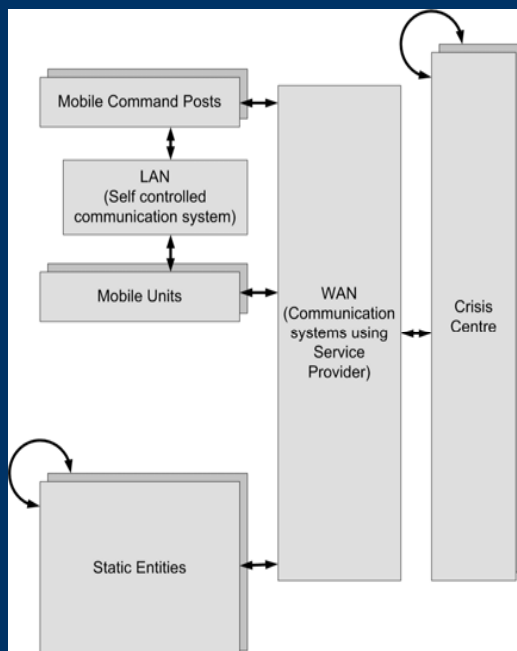

(+)

Planning of national procedures and crisis management arrangements, including the ICT issues

Operations at operational level

(+)

Watch crews in national and agency level centres

Control of operations and routine plus pre-planned ICT network management

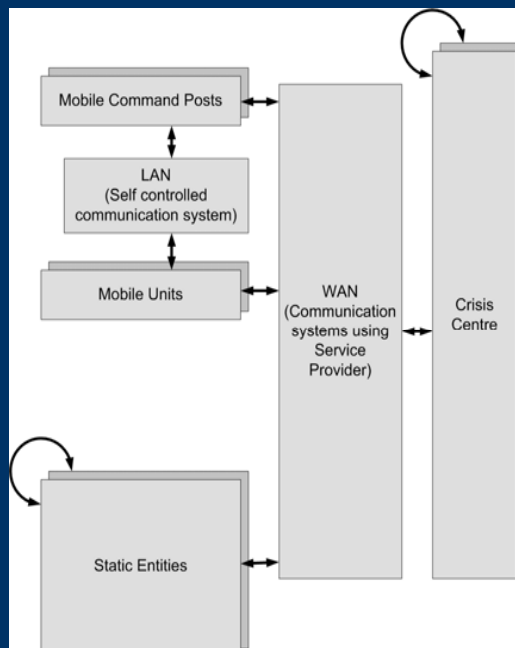

Planning at Tactical level

Experts in Police, Rescue and Fire incidents

Many aspects of drill, including general use of ICT end-devices

(+)

Forum Brussels 2009

12

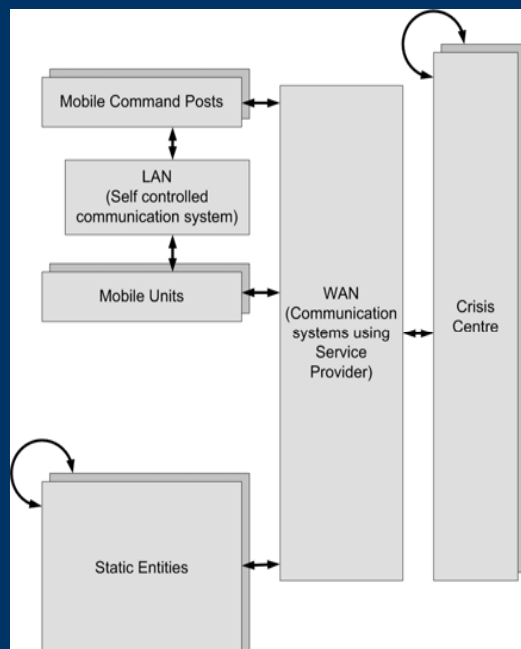

ICT at Tactical level

ICT technicians in Police, Rescue and Fire units.

Configuration and maintenance of ICT end-devices

(+)

Operations at Tactical level

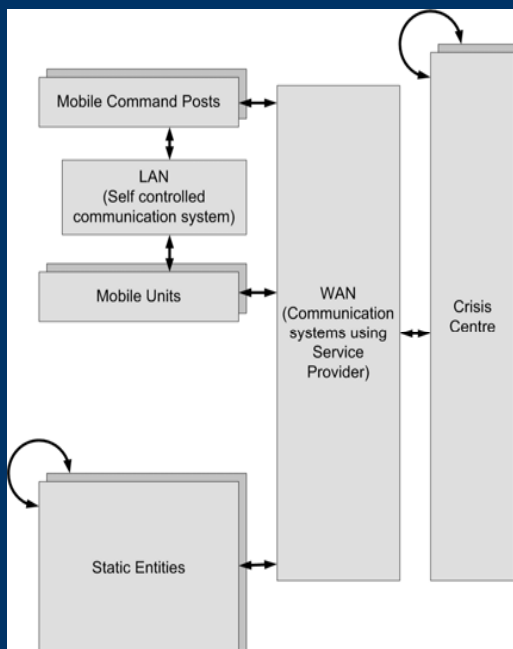

Police officers

Rescue personnel

Firefighters

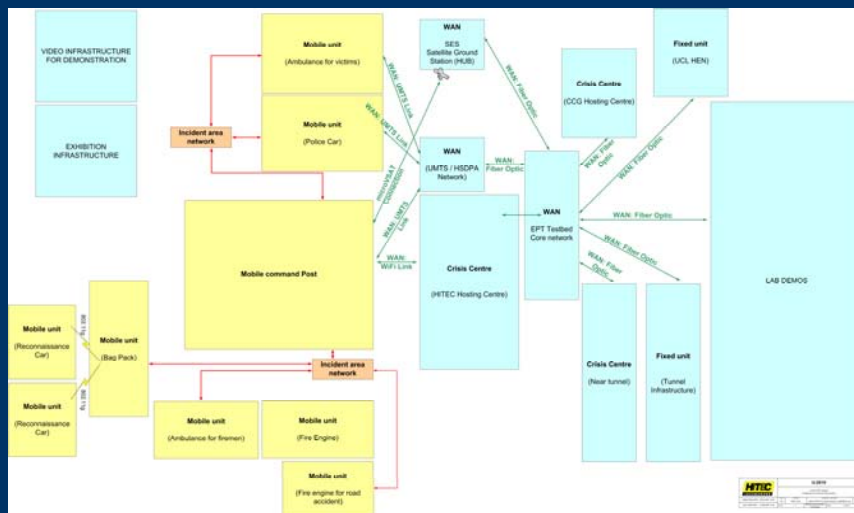

Tactical end-users

(+)

ICT at operational level

Engineers

Technicians

Government personnel

Commercial companies

/ Industry

The myth about user requirements

There are **(no ready to use)** user requirements for next generation PSC networks!

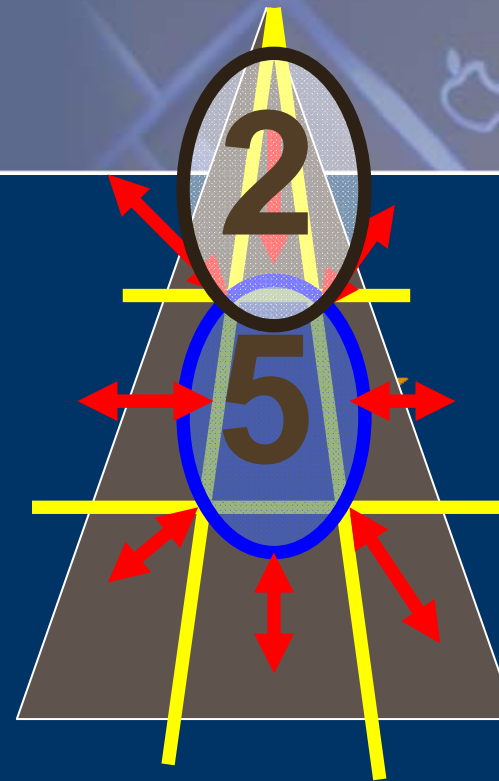

The complete audience has to be **briefed** about new technologies

This effort has to be seen as a major part of the U2010 training, while this as a mission will **never end.**

Stovepipe systems proposed by industry have produced stovepipe procedures producing stovepipe requirements!!

User requirements:

The evolution of user requirements is continuous

Elements of user requirements come from different components of the government structure, they must be understood and brought into a common frame

An open discussion between 2 & 5 is required

Information flow

1

5

Briefing of ministers &/or their advisers

Information flow

Briefing
of CCPC

Briefing of
CONATEL

Final review
of U2010

Demo for Civil
Protection LU

**Training
ICT at operational
level**

**Training
tactical
planners**

**Training
tactical end
user**

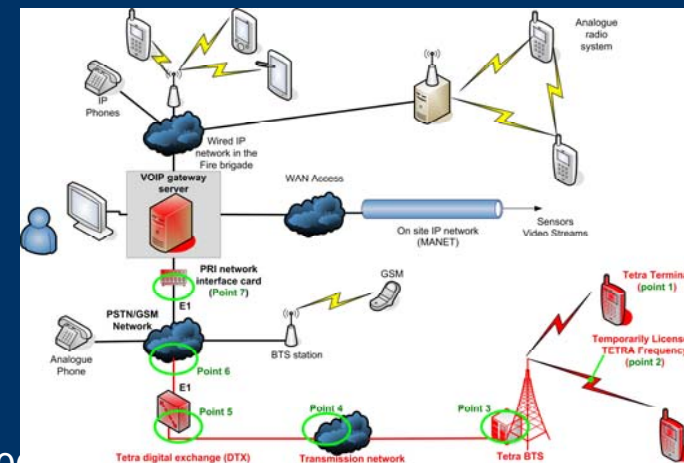

Training ICT at operational level

Many topics of U2010 had to be discussed in a multi-disciplinary framework

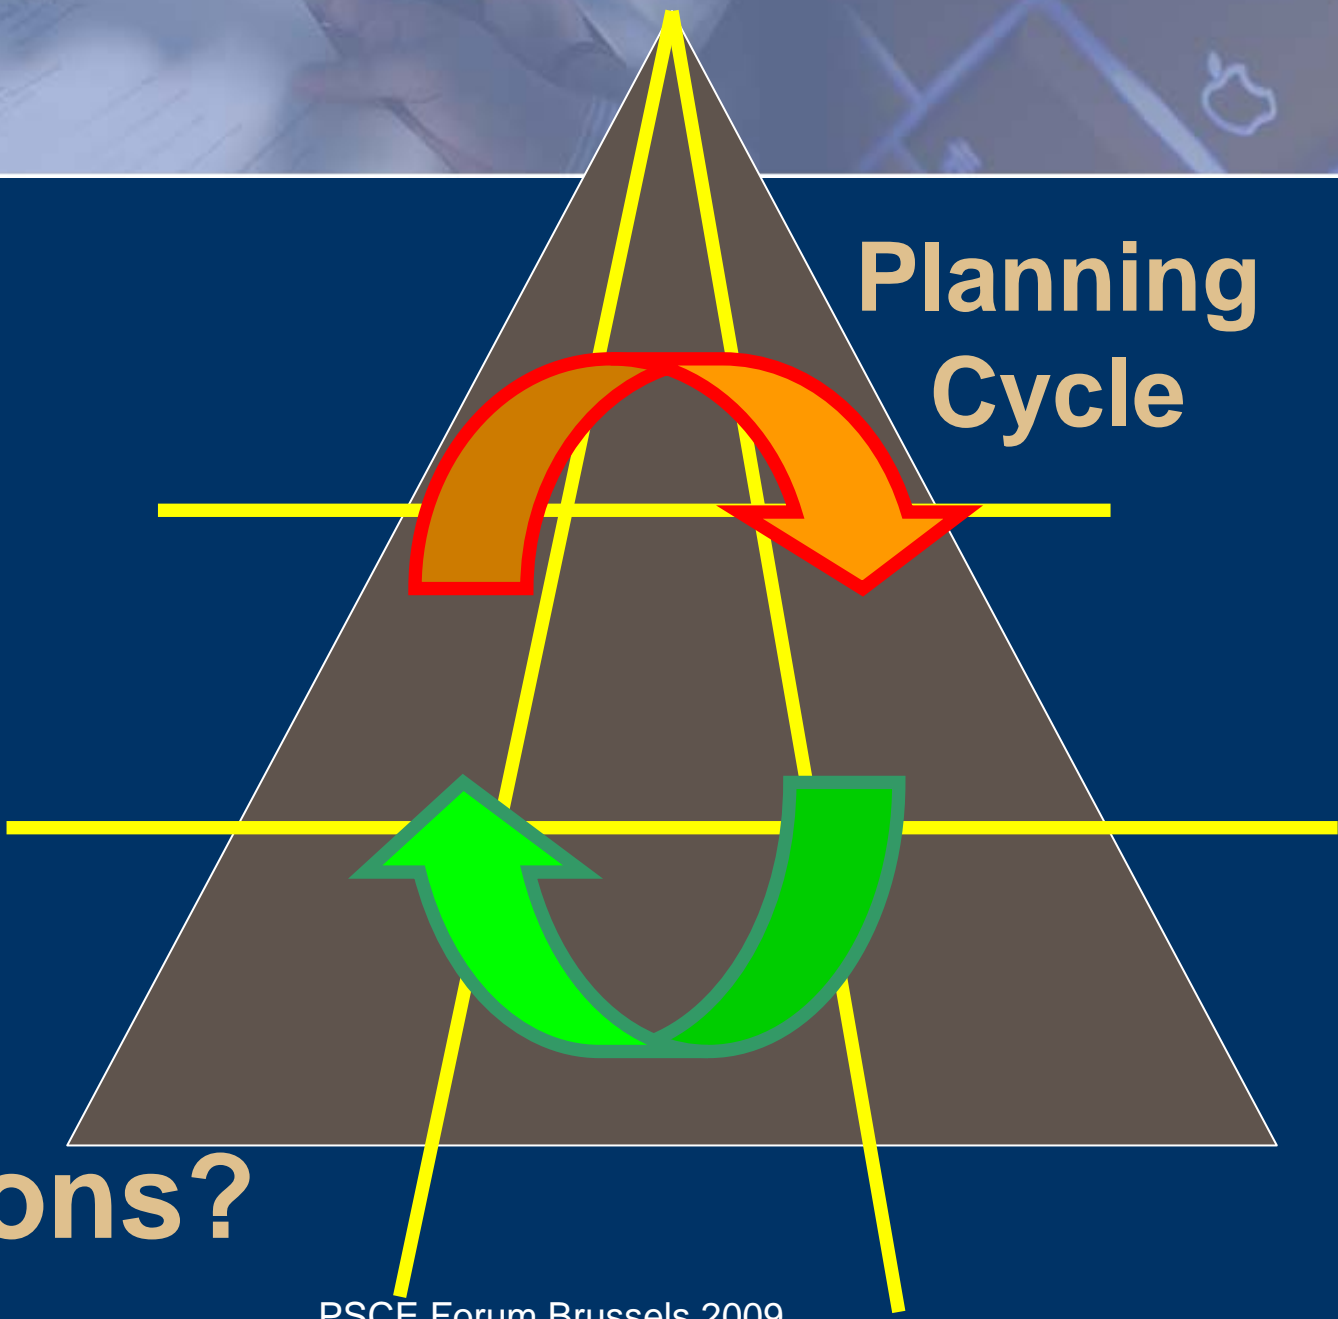

The bulk of U2010 information has been produced by members of 5

Planning Cycle

Questions?

Extensions to be made for the PSCE Forum

**The
industry**

The public

Information flows and influence? Food for thought and discussion!

| Public | | |
|--------|---|---|
| 1 | 2 | 3 |
| 4 | 5 | 6 |
| 7 | 8 | 9 |

| Industry | | |
|----------|---|---|
| 1 | 2 | 3 |
| 4 | 5 | 6 |
| 7 | 8 | 9 |

Possible elements to be addressed for routine implementation:

P1 to P9 and **I1 to I9**

- **Direction of information**
- **Type of information**
- **Desired end state**
- **Effects on stakeholders**

PSCE-F Elements to be addressed for vision or strategic implementation:

P1 to P9 (Public)

I1 to I9 (Industry)

R1 to R9 (Research)

S1 to S9 (Standards and Regulation)

Thank you for the attention
